INTRODUCTION

On March 4, 2020 the Securities and Exchange Commission (Commission or SEC) published its much anticipated private-offering framework review (Proposed Rules).¹ A June 2019 Concept Release² requested public comment on ways the Commission could ease burdens on companies (issuers) seeking capital and expand private-market investor opportunities.³ Commenters offered numerous ways to smooth the discordant, confusing, and often exclusionary exemption rules.⁴ To its credit, the Commission recognizes the current disharmony and its negative impacts on certain entrepreneurs and small businesses, particularly related to geography and demography. Unfortunately, its proposed fixes fall well short.

Congress tried to address existing inequities nearly a decade ago with the Jumpstart Our Business Startups Act of 2012 (JOBS Act).⁵ The JOBS Act created and expanded registration exemptions to open private investment to all Americans and give smaller issuers more capital options. For reasons described below, the JOBS Act failed that goal. Indeed, the Proposed Rules

¹ Facilitating Capital Formation and Expanding Investment Opportunities by Improving Access to Capital in Private Markets, Release No. 33-10763 (Mar. 4, 2020) [85 FR 17956 (Mar. 31, 2020)] (Proposed Rules), <https://www.sec.gov/rules/proposed/2020/33-10763.pdf>.

² Concept Release on Harmonization of Securities Offering Exemptions, Release No. 33-10649 (June 18, 2019) [84 FR 30460 (June 26, 2019)] (Concept Release), <https://www.sec.gov/rules/concept/2019/33-10649.pdf>.

³ This article analyzes “private” issuers, *i.e.* those that have not registered their securities pursuant to the Securities Act of 1933 Pub. L. No. 112-106, 48 Stat. 74 (1933) [15 U.S.C. § 77a *et seq.* (2018)] (Securities Act) and are not subject to reporting obligations under the Securities Exchange Act of 1934, Pub. L. No. 112-158, 48 Stat. 881 (1934) [15 U.S.C. § 78a *et seq.* (2018)].

⁴ Section 5 of the Securities Act [15 U.S.C. 77e(c) (2018)] prohibits the sale of securities without an effective registration statement unless the issuer claims a valid exemption. Exempt offerings are not “public offerings.” *See e.g. SEC v. Ralston Purina*, 346 U.S. 119 (1953) (interpreting Securities Act Section 4(a)(2) [15 U.S.C. § 77d(a)(2) (2018)] “transactions not involving a public offering.”). Smaller businesses and startups typically offer securities through exemptions because they cannot meet the rigors of registration. *See*, Stuart R. Cohn & Gregory C. Yadley, *Capital Offense: The SEC's Continuing Failure to Address Small Business Financing Concerns*, 4 N.Y.U. J. L. & Bus. 1, 7-10 (2007) (discussing the impracticality of registration for smaller issuers), <http://scholarship.law.ufl.edu/faculty/pub/248>.

⁵ Pub. L. No. 112-106, 126 Stat. 306 (2012).

devote much attention to JOBS Act underuse. Regrettably, the Commission's proposals expose its worst instincts and highlight the need for further Congressional action. But a JOBS Act 2.0 will repeat past failure without a sober view of Commission priorities and culture.

To be sure, if approved the Proposed Rules will enhance the current framework.⁶ But progress must be measured against opportunity costs: time to enactment, conditions placed on them, and ignored alternatives that would have forthrightly bolstered capital formation and protected investors. Despite measured progress, the Commission hamstringing job creators through archaic rules, some used nowhere else. Without statutory direction the Commission will keep impeding American entrepreneurs' capital needs in an increasingly competitive geo-environment. Commission-induced hardships will grow starker as tokenized systems evolve that ignore national borders much less state-based sub jurisdictions. Particularly in exempting state-level review, offer regulation, and secondary trading, the Commission burdens issuers with restrictions and ambiguities that waste resources and invite crippling investigations.

While public-market advocates insist only more Commission-created barriers would protect investors and capital by forcing registration and thereby channeling issuers into the public markets,⁷ evidence suggests a better way. A lighter regulatory touch which encourages private ordering while maintaining fairness for entrepreneurs and investors would produce superior results at less cost. A second JOBS Act could accomplish this.

This article reviews the current private-market milieu including what makes it incredibly successful but also exclusionary for most of the five million U.S. small businesses.⁸ It

⁶ The comment period officially closed on June 1, 2020, but the Commission typically accepts comments afterward as it reviews submissions.

⁷ See *infra* Part IV.D.

⁸ According to data from the Small Business Administration, in 2015 there were 5.27 million U.S. firms with less than 20 employees. These firms employed around 20 million people. U.S. SMALL BUS. ADMIN. OFF. OF ADVOCACY,

examines—including through market-actor perspectives—how SEC hostility thwarted the JOBS Act via empirically questionable investor protections. It also proposes statutory solutions to push American capital raising into the 21st century. These bright-line proposals avoid overreliance on SEC staff or state-equivalent interpretation and “facts and circumstances” analysis. These solutions may jar lawmakers accustomed to ceding discretion to agencies with immense power over the nation’s entrepreneurial spirit. But the world will not wait for the Commission to change cultures and the Proposed Rules prove if left alone it will remain inert.

I. THE CURRENT PRIVATE MARKETS

SEC Chair Jay Clayton⁹ describes the U.S. private capital markets as “unrivaled and coveted around the globe.”¹⁰ They foster U.S. economic might and help our firms become global powers. They catalyze unrivaled innovation in places like Silicon Valley, Boston, and New York.¹¹ But this was not happenstance. Late 1970s economic turmoil, lack of entrepreneurial capital, and confusing Commission rules led Congress to pass the Small Business Investment Incentive Act of 1980.¹² This law and resulting Commission action¹³ seeded the venture-capital explosion that

2018 Small Business Profile, <https://www.sba.gov/sites/default/files/advocacy/2018-Small-Business-Profiles-US.pdf>.

⁹ As of this writing President Trump intends to nominate Mr. Clayton as U.S. Attorney for the Southern District of New York, Attorney General William P. Barr on the Nomination of Jay Clayton to Serve as U.S. Attorney for the Southern District of New York, Department of Justice, Office of Public Affairs, (2020), <https://www.justice.gov/opa/pr/attorney-general-william-p-barr-nomination-jay-clayton-serve-us-attorney-southern-district>.

¹⁰ Hon. Jay Clayton, SEC Chair, Remarks to the Economic Club of New York, (New York, NY, Sept. 9, 2019), <https://www.sec.gov/news/speech/speech-clayton-2019-09-09>.

¹¹ See National Venture Capital Association 2020 Yearbook, at 5, (“Outside of California, Massachusetts, and New York, median VC fund size reached \$43 million in 2019, an increase of 57% compared to 2018, but still relatively small to the dominant venture hubs—the median for California, Massachusetts, and New York, collectively, was \$100 million.”), <https://nvca.org/wp-content/uploads/2020/04/NVCA-2020-Yearbook.pdf>.

¹² Pub. L. No. 96-477, 94 Stat 2275 (1980).

¹³ In 1978, the Commission began reexamining the exemptions after complaints about hardships small businesses faced accessing private capital. This included a new rule, public hearings, a concept release, and a simplified form for registered small IPOs. Regulation D, the most important Commission action of the era was “a major response to the new Congressional mandate.” David B. H. Martin, Jr. & L. Keith Parsons, *The Preexisting Relationship Doctrine Under Regulation D: A Rule Without Reason?*, 45 WASH. & LEE L. REV. 1031, 1032 (1988), <https://scholarlycommons.law.wlu.edu/wlulr/vol45/iss3/6>.

propelled so many iconic companies in the 1980s and 1990s and nurtured American prosperity decades hence. Two private capital-raising hallmarks arose from this era: the “accredited investor”¹⁴ and Regulation D 506 (Reg D, private placements).¹⁵

In 1996 Congress enacted the National Securities Market Improvement Act (NSMIA).¹⁶ This statute “covered” Reg D securities,¹⁷ therefore exempting them from Blue Sky laws¹⁸—state-level registration and merit review, depending on each state. The impact of these changes is irrefutable. In 2018, the SEC estimates exempt offerings raised \$2.9 trillion while registered offerings raised \$1.4 trillion. Reg D 506(b) alone outpaced public offerings with an estimated \$1.5 trillion.¹⁹

¹⁴ The Commission had defined accredited investors before the passage of the statute. *See* Securities and Exchange Commission, Exemption of Limited Offers and Sales by Qualified Issuers, Release No. 33-6180, (Jan. 17, 1980) [45 FR 6362 (Jan. 28, 1980)]. Rule 501(a) [17 C.F.R. § 230.501(a) (2019)] contains the current definition. For natural persons it includes net worth and annual income thresholds. In Dec. 2019, the Commission proposed expanding the natural-person criteria to include non-monetary sophistication benchmarks. *See*, SEC Proposes to Update Accredited Investor Definition to Increase Access to Investments, (2019), <https://www.sec.gov/news/press-release/2019-26>.

¹⁵ Unless otherwise noted “Reg D” refers to the current Regulation D 506(b) [17 C.F.R. § 230.506(b) (2019)].

¹⁶ Pub. L. No. 104-290, 110 Stat. 3416 (1996).

¹⁷ *Id.* at sec. 102(b)(4)(D), 110 Stat. 3418-3419 [15 U.S.C. § 77r(b)(4)(F) (2018)].

¹⁸ The origin of the term Blue Sky law is subject to different theories. The most known is from *Hall v. Geiger-Jones Co.*, 242 U.S. 539, 550 (1917), (“The name that is given to the law indicates the evil at which it is aimed; that is . . . speculative schemes which have no more basis than so many feet of blue sky . . .”).

¹⁹ Concept Release, *supra* n. 2 at 78.

FIGURE 1: CAPITAL RAISED IN EXEMPT AND REGISTERED CAPITAL MARKETS 2009-2018

Source: Securities and Exchange Commission

Reg D dominates the private-capital landscape. Only accredited investors use it, severely restricting the potential-investor pool.²⁰ But it requires minimal upfront effort and cost before capital becomes available. Issuers gauge interest (test the waters) with accredited investors in their circles before filing paperwork, accredited investors declare their status via “substantive, preexisting relationships” with issuers or their agents,²¹ the SEC only requires notice filing, and states cannot interfere. No monetary limits exist for investors or issuers.²²

²⁰ As a technical matter Reg D is available to a limited number of unaccredited investors, *see infra* n. 43.

²¹ Broker Dealers are not subject to general solicitation prohibitions who solicit existing customers from a pre-determined, screened list of potential investors. *See, e.g.*, Arthur M. Borden, Esq., SEC No-Action Letter, 1978 SEC No-Act. LEXIS 2001 (Oct. 6, 1978).

²² 17 C.F.R. § 230.500 *et seq.* (2019) *Cf.* Ltr. from Joe Wallin, et al., to the SEC on the Concept Release (Sept. 23, 2019) at 5,7 (Group of securities lawyers describing the procedure for Reg D 506(b) raises.), <https://www.sec.gov/comments/s7-08-19/s70819-6182683-192407.pdf>.

Investors, however, do not surrender their loot blindly. Reg D private-placement memorandums disclose issuer information about structures, plans, and risks. The reason is simple. According to Heritage Foundation Senior Fellow David Burton, “In the absence of meaningful disclosure about the business and a commitment, contractual or otherwise, to provide continuing disclosure, few would invest in the business and those that did so would demand substantial compensation for the risk they were undertaking by investing in a business with inadequate disclosure.”²³ Further, federal law protects these offerees against misleading statements and fraud.²⁴

Reg D provides the private capital-raising model. Its success arose from balancing regulation with parties’ freedom to contract. Because investors are accredited the Commission accepts they can “fend for themselves” without mandatory disclosures.²⁵ Wise policy may require extra safeguards when gauging exemptions open to all, as with certain JOBS Act titles. But lawmakers must test this purported need for higher scrutiny against what experience shows works.

II. DISPARITIES IN THE REG D-CENTRIC PARADIGM

Reg D-centered private-market success has a price; data reveals disturbing inequities. First, only 13% of U.S. households with sufficient annual income or net-worth use it.²⁶ The dearth of private-investment opportunities for retail investors has been called “Securities Law’s Dirty

²³ Ltr. from David Burton, Senior Fellow, Heritage Foundation to the SEC on the Concept Release (Sept. 24, 2019), at 19, <https://www.sec.gov/comments/s7-08-19/s70819-6193328-192495.pdf>.

²⁴ Frequently asked questions about exempt offerings, Securities and Exchange Commission, “All securities transactions, even exempt transactions, are subject to the antifraud provisions of the federal securities laws.”, <https://www.sec.gov/smallbusiness/exemptofferings/faq>, Cf. Section 17 of the Securities Act, [15 U.S.C. § 77q].

²⁵ See Regulation D Revisions; Exemption for Certain Employee Benefit Plans, Release No. 33-6683 (Jan. 16, 1987) [52 FR 3015 (Feb. 2, 1987)].

²⁶ Concept Release, *supra* n. 2 at 36. *See supra* n. 14 for possible expansion.

Little Secret.”²⁷ And as one might expect, this cohort is not evenly dispersed either geographically or demographically.

A. Geographic Disparities

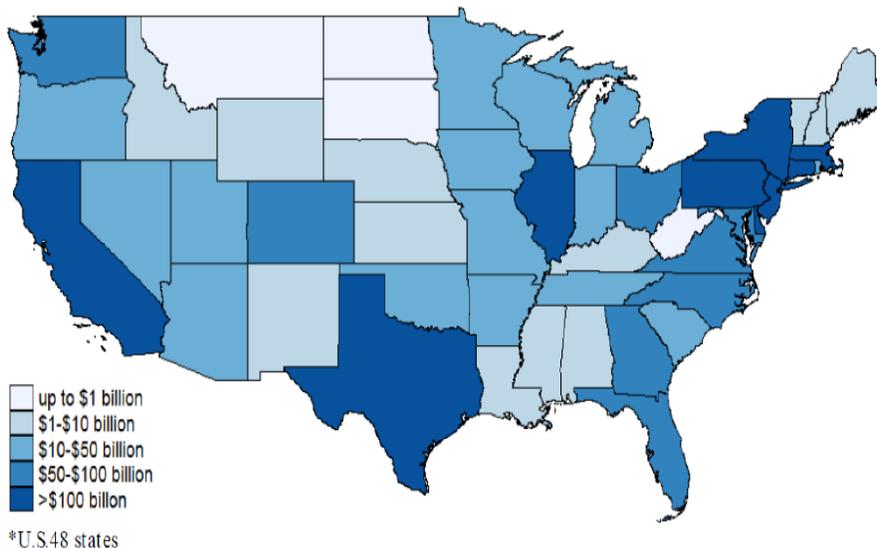

Not only are 87% of households barred from Reg D but the eligible 13% mass in entrepreneurial hubs. Geographic outsiders often cannot access these funding channels. Indeed, aggregate Reg D-capital concentrates where accredited investors cluster.²⁸ This has real effects on American prosperity. One study found lack of access to accredited ‘angel’ networks experience reduced startup activity and compounded negative economic impacts.²⁹

FIGURE 2: AGGREGATE AMOUNT RAISED IN REG D RULE 506 OFFERINGS BY ISSUER LOCATION, 2009-2018

Source: Securities and Exchange Commission

B. Demographic Disparities

Reg D exacerbates disparities and curbs wealth creation in other ways. If capital raising only occurs in select areas, exclusionary conventions and cultures will form. In 2019 the SEC Office of the Advocate for Small Business Capital Formation found 29.5% of angel investors and 11% of venture capitalist were women and 71% of venture capital firms had no women.³⁰ From 2013-2017 venture capital backed-businesses were 1% Black, 2% Latino, 2% Middle Eastern, 18% Asian, and 77% White.³¹ Moreover, new black-owned businesses start with around three times less capital than new white-owned businesses.³² Further, minority entrepreneurs report lack of capital disproportionately affects their profitability.³³

III. CONGRESS ENACTED THE JOBS ACT TO CREATE OPPORTUNITIES BEYOND REG D

Lawmakers saw how the flawed Reg D model failed small businesses and entrepreneurs outside select hubs or lacking certain profiles.³⁴ Legislators sought to democratize investing for both entrepreneur and backer.³⁵ A rare bipartisan moment birthed the JOBS Act. At a Rose Garden signing ceremony President Obama gushed about the law’s potential for unconventional capital formation and retail investors to support companies at their earliest and most lucrative stages. “Right now, you can only turn to a limited group of investors -- including banks and wealthy individuals -- to get funding. Laws that are nearly eight decades old make it impossible for others to invest. . . . Because of this bill, start-ups and small business will now have access to a big, new pool of potential investors -- namely, the American people. For the first time, ordinary Americans will be able to go online and invest in entrepreneurs that they believe in.”³⁶

The JOBS Act contained three titles that expanded issuer access to investor pools.³⁷ Title II directed the Commission to stop prohibiting general solicitation for Regulation D. Title IV

entrepreneurs, as well as entrepreneurs based in Middle America, often struggle to obtain exposure to and capital from traditional venture investors.”) <https://www.sec.gov/comments/s7-08-19/s70819-6189775-192417.pdf>.

³⁴ See, e.g., Statement of Sen. Jeff Merkley, 157 Cong. Rec. S8458-02 (daily ed. Dec. 8, 2011) (“In recent years, small businesses and startup companies have struggled to raise capital. The traditional methods of raising capital have become increasingly out of reach for many startups and small businesses. . . . Low-dollar investments from ordinary Americans may help fill the void, providing a new avenue of funding to the small businesses that are the engine of job creation.” Cf. Seth C. Oranburg, *Bridgefunding: Crowdfunding and the Market for Entrepreneurial Finance*, 25 CORNELL J. L. & PUB. POL’Y 397, 413–14 (2015) (discussing funding gap between \$1-5 million where businesses fail for lack of capital access.).

³⁵ FINAL RPT. OF THE 2018 SEC GOVERNMENT-BUSINESS FORUM ON SMALL BUSINESS CAPITAL FORMATION (Jun. 2019) (2018 Forum Report) at 20, (discussing the intent of Regulation Crowdfunding.), <https://www.sec.gov/info/smallbus/gbfor37.pdf>.

³⁶ Remarks by the President at JOBS Act Bill Signing, The White House, Office of the Press Secretary (Apr. 5, 2012), <https://obamawhitehouse.archives.gov/the-press-office/2012/04/05/remarks-president-jobs-act-bill-signing>.

³⁷ This article covers only the private exemptions in the JOBS Act, other titles such as Title I, Reopening American Capital Markets to Emerging Growth Companies, Pub. L. No. 112-106, 126 Stat. 307, which eases private company transition into the public markets are beyond its scope. It also does not cover changes to Rule 144A [17 C.F.R. § 230.144A (2019)], Pub. L. No. 112-106, sec. 201(a)(2), 126 Stat. 314, Cf. *infra* n. 132.

created a “new” Regulation A with higher limits and other enhancements open to “Qualified Purchasers.” Title III created a new “investment” or “equity” crowdfunding exemption.

The JOBS Act also crucially changed another capital-raising factor. Title V amended Section 12(g)(1)(A) of the Securities Exchange Act of 1934³⁸ known as the ‘12(g) Rule.’ This rule states companies with \$10 million in total assets and a class of equity securities “held of record” by a certain number of holders, must register their securities. Title V increased the threshold from 500 persons to 2,000 persons or 500 unaccredited investors. The JOBS Act directed the Commission to appropriately apply the 12(g) Rule to the law.

A. Regulation D 506(c)

JOBS Act Title II did not expand the investor pool per se. Instead it loosened communication rules, allowing accredited-investor searches beyond familiar circles. As noted above, Reg D reigned well before the JOBS Act. Reg D arose from 1970s political and economic turmoil. Oil crises, weak economic growth, high interest rates, plunging stock prices, and an SEC determined to force registration³⁹ meant entrepreneurs struggled to raise capital.

After the 1980 statutory push,⁴⁰ in 1982 the Commission created Reg D as a safe harbor to ensure compliance with nonpublic offerings defined in Securities Act Section 4(a)(2).⁴¹ Reg D sought to simplify and clarify rules and harmonize state and federal exemptions.⁴² Reg D allowed unlimited numbers of accredited investors to join these offerings without investment

³⁸ Pub. L. No. 112-106, 126 Stat. 325 [15 U.S.C. § 78l(g)(1)(A) (2018)].

³⁹ As more issuers offered securities under what is now Section 4(a)(2) of the Securities Act, [15 U.S.C. § 77d(a)(2)] “transactions by an issuer not involving any public offering,” the Commission curtailed the exemption by “clarifying” limitations on its availability. *See* Non-Public Offering Exemption, Release No. 33-4552 (Nov. 6, 1962) [27 FR 11316 (Nov. 16, 1962)].

⁴⁰ *See supra* n. 13.

⁴¹ 15 U.S.C. § 77d(a)(2) (2018).

⁴² Revision of Certain Exemptions From Registration for Transactions Involving Limited Offers and Sales, Release No. 33-6389 (Mar. 8, 1982) [47 FR 11251 (Mar. 16, 1982)].

limits or mandatory disclosures. It also allowed small numbers of unaccredited investors to join with daunting mandatory disclosure⁴³ and sophistication thresholds.⁴⁴ The Commission also created two lesser-used exemptions, Regulation D 504⁴⁵ and Regulation D 505.⁴⁶ None of these exemptions preempted Blue Sky laws.

After Reg D, private placements grew from \$18 billion in 1981 to \$202 billion in 1988.⁴⁷ In 1996 Congress further nurtured Reg D with NSMIA.⁴⁸ This Act amended Securities Act Section 18 to “cover” securities from Blue Sky laws, including Commission safe harbors under Securities Act Section 4(a)(2).⁴⁹ After NSMIA, the private-placement market exploded.⁵⁰

JOBS Act Title II required the Commission to adopt rules for generally solicited accredited investors. Instead of a simple declaration, issuers needed to verify status through “reasonable

⁴³ Although Reg D 506(b) allows up to 35 nonaccredited investors, issuers wishing to accept such investors must provide disclosures pursuant to Rule 502(b) [17 C.F.R. § 230.502(b)(2)(i)-(vii)] (2019)]. These disclosures mirror the nonfinancial disclosures of Regulation A and the financial statement requirements of a Form S-1 with reduced audit requirements [17 C.F.R. § 230.502(b)(2) (2019)]. The SEC estimates in 2015, 2016, 2017, and 2018 nonaccredited investors joined only 6% of Reg D 506(b) offerings and raised between 2%-3% of Reg D 506(b) capital during that time. Concept Release, *supra* n. 2 at 79.

⁴⁴ 17 C.F.R. § 230.506(b)(2)(ii).

⁴⁵ Reg D 504 [17 C.F.R. § 230.504 (2019)] permits issuers to raise up to \$5 million in a 12-month period from an unlimited number of investors without regard to whether those investors are accredited. Issuers conducting a Rule 504 offering are not subject to the information requirements in Rule 502(b) but are subject to Blue Sky laws.

⁴⁶ The Commission repealed Reg D 505 in 2016. *See* Exemptions to Facilitate Intrastate and Regional Securities Offerings, Release No. 33-10238 (Oct. 26, 2016) [81 FR 83494 (Nov. 21, 2016)]. Reg D 505 ceased on May 22, 2017.

⁴⁷ Kellye Y. Testy, *The Capital Markets in Transition: A Response to New SEC Rule 144A*, 66 IND. L.J. 233, 242 (1990). (Testy uses the term ‘private placement’ which connotes securities sold under Securities Act Section 4(a)(2), not only Regulation D its Commission-created nonexclusive safe harbor. But as experience shows and noted by Testy, Reg D is the primary means of effectuating private placements.).

⁴⁸ *See supra* n. 16.

⁴⁹ *See* 15 U.S.C. § 77r(b)(4)(F) (2018); 17 C.F.R. § 230.506(a) (2019).

⁵⁰ Ltr. from Rutheford B. Campbell, Jr., Prof. U. of Ky. Coll. of Law, to the SEC on the Concept Release (June 18, 2019) at 9 (“The migration to the Rule 506 exemption was driven by state blue sky laws requiring registration. State registration authority over Rule 506 offers was preempted by the National Securities Market Improvement Act (15 U.S.C. § 77r (2018)).”), <https://www.sec.gov/comments/s7-08-19/s70819-6240706-192714.pdf>; *Cf.* Burton Ltr., *supra* n. 23 at 32, (“Regulation D is a success story. . . It is a success because it is a lightly regulated means of raising capital and because of the preemption of state Blue Sky registration and qualification laws with respect to Rule 506 offerings since the enactment of the National Securities Markets Improvement Act of 1996.”).

steps.” Congress directed the Commission to define “reasonable steps.” It also exempted broker dealer registration for website offers under the title meeting certain requirements.⁵¹

The Commission finalized rules on July 10, 2013.⁵² It split Reg D into two parts. Reg D 506(b) would remain the “old” Reg D that forbade general solicitation. Reg D 506(c) would state Title II.⁵³ The Commission defined two “reasonable steps” methods. First was “principles based.” The second was a non-exhaustive list of verification documents.

For the first, issuers could reasonably determine status by analyzing each purchaser and transaction via ‘facts and circumstances.’ The Commission listed factors such as the nature of the purchaser and the type of accredited investor the purchaser claimed; the amount and type of information the issuer had about the purchaser, the offering nature, such as how the issuer solicited the purchaser, and the offering terms, such as minimum investment.⁵⁴

The non-exhaustive verification documents were imposing. Verifying through income included: two most recent years of IRS forms including W2, 1099, Schedule K-1 to Form 1065, and Form 1040, and a declaration stating the purchaser reasonably expected to reach necessary income levels during the current year.⁵⁵ Net-worth verification included: bank statements, brokerage statements and other statements of securities holdings, certificates of deposit, tax assessments, and independent third-party appraisal reports. With respect to liabilities: a consumer report from at least one nationwide consumer-reporting agency. And a declaration stating the purchaser had disclosed all liabilities needed to determine net worth. All only valid if dated within three

months.⁵⁶ The Commission also allowed certain third-party professionals such as broker dealers, investment advisors, attorneys, and CPAs to verify status.⁵⁷

B. Regulation A+

Unlike Reg D, issuers had mostly ignored Regulation A. The Commission adopted Regulation A under the authority of Securities Act Section 3(b) soon after the Securities Act of 1933 to shield smaller issuers from registration.⁵⁸ Current Regulation A issuers must traverse a Commission-led qualification process, which averages over two months and involves back and forth between issuer and staff.⁵⁹ The exemption floundered despite the Commission repeatedly raising the offer limit and eventually loosening communication rules.⁶⁰ Use spiked slightly after 1992 changes but quickly crested. Issuers filed 116 Regulation A offerings in 1997, dropping to 19 in 2011. Qualified offerings dropped from 57 in 1998 to 1 in 2011.⁶¹ Issuers shunned Regulation A because of its complexities, time-consuming qualification process, lack of Blue Sky preemption, low limits, and Reg D options.⁶²

REV. 535 (2018), <https://scholarship.shu.edu/shlr/vol48/iss2/7>.

Congress again tried to boost Regulation A with JOBS Act Title IV, which added Section 3(b)(2) to Regulation A statutory authority in Securities Act Section 3(b). This became known as Reg A+. ⁶³ It increased the offer limit from \$5 million to \$50 million, securities could be offered and sold publicly, were “unrestricted” under federal law, and issuers could ‘test the waters.’ Congress also, however, mandated disclosure and compliance obligations including audited financial statements and periodic reports. It also limited available security types. It ordered biennial offer-limit reviews and commissioned a Government Accountability Office report on Blue Sky-law impact. ⁶⁴ It also “covered” the securities from Blue Sky laws for “Qualified Purchasers,” a term Congress charged the Commission with defining. ⁶⁵

The Commission adopted final rules on March 25, 2015. ⁶⁶ It split Reg A+ into two tiers. The Commission limited Tier 1 to \$20 million annually, while Tier 2 retained the \$50 million limit. ⁶⁷ It cabined how much selling securityholders could sell at first offering and within the following 12 months to 30% aggregate offering price. And further limited affiliates to a hard ceiling. Federally, Reg A+ shares would be freely tradable. ⁶⁸ Tier 2 accredited investors were uncapped but the Commission limited unaccredited investors to the greater of 10% annual income or net worth. ⁶⁹ It defined Qualified Purchasers as any Tier 2 purchaser. ⁷⁰ The Commission conditionally exempted Tier 2 from the 12(g) Rule provided issuers remained compliant with

⁷⁰ 17 C.F.R. § 230.256 (2019).

ongoing reporting, hired a transfer agent, and remained under certain public float or revenue thresholds,⁷¹ in addition to 12(g) Rule recordholder and asset criteria.⁷²

The Commission made offering circulars and disclosures akin to smaller registered offerings, especially for Tier 2.⁷³ This meant ongoing reporting including annual reports,⁷⁴ semi-annual reports,⁷⁵ and “current event” reports.⁷⁶ Annual reports cover among other topics: three years’ business operations, interested transactions, beneficial ownership of voting securities, identities of directors, officers, and significant employees, executive compensation, management discussion and analysis of liquidity, capital resources, two years’ operation results, and two years’ audited financial statements.⁷⁷ Semi-annual reports include additional management discussion and analysis and financial statements similar to registered offering’s Form 10-Q.⁷⁸ Moreover Tier 2 issuers must disclose within four business days any Commission-deemed “significant and substantial” event.⁷⁹ The final rules did not require Tier 1 ongoing reporting. These issuers must only file Form 1-Z exit reports 30 days after completing or terminating an offering.⁸⁰ This contains only summary information including qualification date, amount of securities qualified, amount sold, price, amount sold by selling security holders, fees, and net proceeds.⁸¹

⁸¹ Regulation A Release, *supra* n. 66 at 160; Form 1-Z.

The Commission reversed itself in one respect and failed to act in others. It originally proposed to exempt offers from Blue Sky laws for both tiers and sales for Tier 2. But the final rules exempted only offers and sales for Tier 2, Tier 1 offers and sales would be subject to state-by-state compliance.⁸² The Commission reasoned Tier 1’s anticipated local nature should portend state regulatory authority. After a vigorous and coordinated effort to kill Reg A+ preemption,⁸³ the North American Securities Administrators Association (NASAA), the state regulators’ association, responded to the JOBS Act and complaints about onerous double review with a “Coordinated Review Plan”⁸⁴ it claimed would “ease regulatory burdens for filers without sacrificing investor protection.”⁸⁵ The Commission also declined to exempt Reg A+ secondary trading despite commenter support.⁸⁶ The Commission stated it needed time to “review and consider changes” but preempting secondary trading would not be “appropriate at the outset.”⁸⁷ Thus, despite Congress designating Reg+ A securities unrestricted, the Commission ensured Tier 1 offers, sales, and resales and Tier 2 resales would face state scrutiny.

C. Regulation Crowdfunding

JOBS Act Title III created a crowdfunding tool for smaller issuers and retail investors. It amended the Securities Act to add Section 4(a)(6).⁸⁸ Issuers could raise \$1 million per 12-months with periodic inflation adjustments.⁸⁹ In 2017, the Commission adjusted the limit to \$1.07 million.⁹⁰ The law set individual limits based on an aggregate net worth, annual-income formula. Investors could devote \$2,000 or 5% of annual income or net worth if either was less than \$100,000 (it did not specify which financial marker applied, for instance ‘greater of’ or ‘lesser of’ the two) or 10% if either was equal or more than \$100,000, with a maximum aggregate cap of \$100,000.⁹¹ Issuers would sell through broker dealers or a new statutory creation: funding portal intermediaries (portals).⁹²

The statute set issuer disclosures, including business plan, officers and directors, capital structure, tiered financial documents up to audits, use of proceeds, amount sought, valuation, risks, and promoter compensation. It restricted communication about offers and sales and required annual reports.⁹³ The statute restricted first-year resales except to certain offerees.⁹⁴ It directed the Commission to exempt Title III securities “conditionally or unconditionally” from the 12(g) Rule,⁹⁵ and preempted Blue Sky laws.⁹⁶ Congress also limited state filing fees to issuer principal place of business or where it sold 50% or more securities.⁹⁷ Title III also ordered

certain portal requirements⁹⁸ and exempted them from state interference with respect to their businesses as such.⁹⁹

The Commission adopted Regulation Crowdfunding (Reg CF) final rules on October 30, 2015.¹⁰⁰

The rules restricted Reg CF further where the Commission deemed public interest required and did not expand any material rules. For instance, despite warnings the modest \$1 million statutory limit would hamper use,¹⁰¹ the Commission kept it for consistency and because of Reg CF's novelty.¹⁰² The Commission also conservatively approached individual limits. The final rules clarified limits applied to all Reg CF investors, even accredited investors. The Commission recognized the capital-formation burden but justified it on Congressional intent and to minimize investor risk in crowdfunding transactions.¹⁰³ Final rules required investors to meet the \$100,000 threshold for *both* annual income and net worth for the 10% bracket and \$100,000 cap. If investors did not meet both they faced the lower 5% bracket. And it imposed the *lesser of* annual income or net worth as the limit once in either bracket. The Commission kept the statutory tiered financial-statements review but did exempt first-time issuers from audits.¹⁰⁴ It also kept the statutory discussion of risk factors.¹⁰⁵

The Commission required further disclosures beyond statutory mandates.¹⁰⁶ For example, while the statute only required director and officer names (and any persons occupying a similar status

or performing similar functions) the Commission required three-years' business experience including principal occupation and employment, including positions with other corporations or organizations.¹⁰⁷ It also regulated oversubscriptions,¹⁰⁸ how investors could complete or cancel investments,¹⁰⁹ and required investors reconfirm commitments after material changes, or the investment would cancel and funds automatically return.¹¹⁰

The Commission required several other 'public interest' disclosures.¹¹¹ These included intermediary compensation and other interests in the transaction,¹¹² number of issuer employees,¹¹³ material indebtedness,¹¹⁴ past three years of exempt capital raises,¹¹⁵ transactions by interested persons including officers, directors, major equity holders, promoters, or family members that exceed a commission-defined 5% threshold,¹¹⁶ a narrative discussion and analysis by management of financial condition, including, to the extent material, liquidity, capital resources, and historical operation results.¹¹⁷ The Commission also mandated issuers include additional material information to make the disclosures not misleading "in light of the circumstances in which they were made."¹¹⁸ And it required disclosure of any missed annual reports.¹¹⁹ As for the 12(g) Rule the Commission conditionally exempted Reg CF provided

issuers remained current in reporting, had less than \$25 million in assets, and hired a registered transfer agent.¹²⁰

The Commission also limited issuer communication aligned with and beyond the statute. First it required all transactions occur through portals.¹²¹ This essentially forbade in person investor meetings.¹²² The Commission restricted issuer advertising outside portals to “tombstone” ads¹²³ that contained statutory “terms” and other factual information about issuer legal identity, location, contact information, and a brief business description.¹²⁴ Adverts could not include more information but instead must hyperlink to portals. The Commission further clarified “terms” as amount of securities offered, security type, price, and offer closing date.¹²⁵ The Commission did provide flexibility for the online and social-media environs offers would appear.¹²⁶

IV. THE JOBS ACT FAILED TO CREATE EXPECTED OPPORTUNITIES

Despite President Obama’s hope, the JOBS Act changed little. Eight years hence, it has not democratized investing.¹²⁷ Critics have labeled various provisions “generally disappointing,”¹²⁸ a

Rodrigues, *Financial Contracting with the Crowd*, 69 EMORY L.J. 397, 400 (2019) (Rodrigues, *Financial Contracting*) (referring to Reg CF), <http://law.emory.edu/elj/content/volume-69/issue-3/articles/financial-contracting-with-crowd.html>. Cf. Burton Ltr., *supra* n. 23 at 47, (“Few firms have proven willing to deal with the costs and obligations of Regulation CF to raise under a million dollars.”).

¹³² This figure does not count “Other Exempt Offerings” which contain mainly Rule 144A buyers and Regulation S. Rule 144A is a nonexclusive safe harbor for resales of restricted securities. It typically involves a two-step process involving a sale to a financial institution and a resale to a “Qualified Institutional Buyer.” Regulation S transactions involve offshore transactions not involving direct selling in the U.S. See Concept Release, *supra* n. 2 at 19-20 and n. 41.

capturing 4.2% of the Reg D market.¹³³ Reg D beats Reg D 506(c) both in aggregate and average.¹³⁴

FIGURE 3: CAPITAL RAISED IN REGULATION D RULE 506(B), RULE 506(C), AND OTHER EXEMPT OFFERINGS, 2009-2018

Source: Securities and Exchange Commission

B. Regulation A+ so far

From June 2015 through 2019, Reg A+ issuers raised \$2.446 billion.¹³⁵ Issuers preferred Tier 2 raising about 91% despite ongoing reporting.¹³⁶ Even issuers who sought amounts within Tier 1 range and thus could choose either often chose to avoid state-level review. According to the Commission, “The larger Tier 2 offering limit does not appear to be the sole factor for issuers’ decision between tiers, given that approximately 43% of filed Tier 2 offerings and 41% of qualified Tier 2 offerings sought amounts not exceeding the Tier 1 offering limit of \$20

¹³³ See Table One.

million.”¹³⁷ The reasons Tier 1 should be abandoned are discussed below. But after five years, its disfavor is manifest.

FIGURE 4: CAPITAL REPORTED RAISED UNDER REGULATION A, 2015-2019

Source: Securities and Exchange Commission

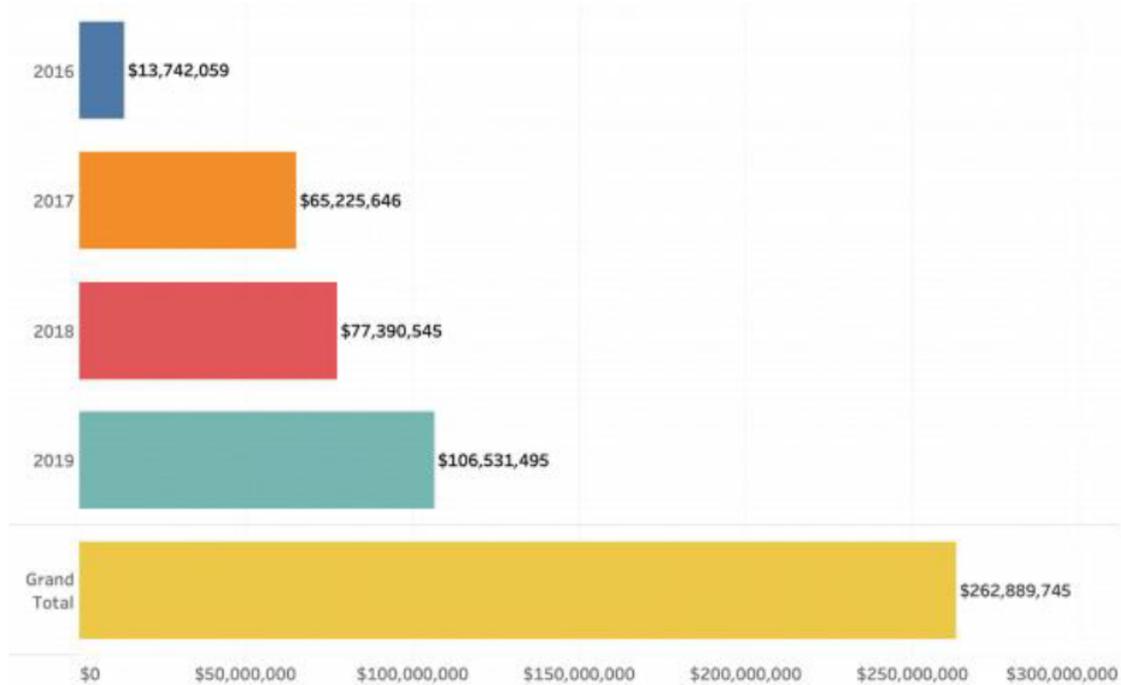

C. Regulation Crowdfunding so far

Unlike Reg A+ and Reg D 506(c), Reg CF had no analog and was Congress’s boldest move. It has also disappointed though adoption has steadily grown as awareness increased and successes emerged. Crowdfund Capital Advisors, which curates Reg CF data estimates that from May 2016 through 2019 issuers raised almost \$263 million, with gaudy 2018-2019 year-to-year growth of 37%, and had pumped almost one billion into local economies.¹³⁸

¹³⁷ *Id.*

¹³⁸ JD Alois, *Sherwood Neiss of Crowdfund Capital Advisors Updates on Reg CF Progress: “Successful Reg CF companies have pumped almost \$1 billion into local economies.”* CROWDFUND INSIDER, Feb. 10, 2020,

FIGURE 5: PROCEEDS INTO REGULATION CROWDFUNDING CAMPAIGNS/YEAR

Source: Crowdfund Capital Advisors

Despite Reg CF growth, Reg D still dwarfs it with almost \$1.5 trillion raised in 2019.¹³⁹

Comparing Reg D within Reg CF constraints, differences remain stark. By SEC data, from mid-2016 through 2018 Reg CF had 519 completed raises totaling \$108.2 million. During that time and within Reg CF limits, approximately 12,700 Reg D issuers raised \$4.5 billion.¹⁴⁰

D. Critics contend JOBS Act disappointments mean its titles should be scrapped or curtailed

Despite progress and allowing issuer and regulator adjustment time, the JOBS Act has floundered. The Commission admits “modest” use.¹⁴¹ This has led hostile interests—state

¹⁴¹ Proposed Rules, *supra* n. 1 at 119 (“While the 2015 amendments have stimulated the Regulation A offering market, aggregate Regulation A financing levels remain modest relative to traditional IPOs and the Regulation D market.”); *Id.* at 265 (“[T]he use of Regulation A by reporting companies has been modest to date.”); *Id.* at 126

regulators, consumer groups, and academics—to call for its elimination or severe curtailing,¹⁴² particularly the 12(g) Rule.¹⁴³ In support they cite underuse and fraud concerns.¹⁴⁴ Under this view only the bulwark of registration and revitalized public markets can protect retail investors and revive gloried mid-20th century days. But this path would hinder U.S. global competitiveness, particularly with the emerging token economy, which will never conform to registered offerings.

(“The study found that during the considered period, while the [Regulation Crowdfunding] market exhibited growth . . . the number of offerings and the total amount of funding were relatively modest.”).

¹⁴² See e.g., Consumer Federation Ltr., *supra* n. 130 at 103-104, (“[G]iven the abysmal performance of Reg A+ securities since the JOBS Act was adopted, the Commission should give serious consideration to whether the exemption should be scaled back or eliminated entirely.”); Ltr. from Americans for Financial Reform Education Fund, AFL-CIO, to the SEC on the Concept Release (Sept. 30, 2019) at 3 (Further proposed expansion of private exemptions to encourage utilization “highly disturbing.”), <https://www.sec.gov/comments/s7-08-19/s70819-6233332-192690.pdf>; Ltr. from Tyler Gellasch, Exec. Dir., Healthy Markets to the SEC on the Concept Release (Sept. 30, 2019) at 29 (“[W]e urge the Commission to consider curtailing or eliminating some of the obvious failures of past efforts to spur capital formation.”), <https://www.sec.gov/comments/s7-08-19/s70819-6233891-192709.pdf>; Ltr. from Erik Gerding, Prof. of Law, U. of Colo., et al. to the SEC on the Concept Release (Sept. 24, 2019) at 9,15 (Group of fifteen law professors commenting that retail investors should be “encouraged” and “steered” into low-cost index funds of public securities and “Congress and the Commission may need to take more aggressive action to usher firms into the public markets.”), <https://www.sec.gov/comments/s7-08-19/s70819-6193340-192501.pdf>; Ltr. from Christopher Gerold, Pres. NASAA, to the SEC on the Concept Release, (Oct. 11, 2019) (NASAA Ltr.) at 1 (“NASAA supports a reexamination of the private offering framework with a goal towards strengthening and growing our public securities markets and rejects the view that modernizing the securities regulatory framework requires expanding the availability of private offerings.”), <https://www.sec.gov/comments/s7-08-19/s70819-6288085-193367.pdf>.

V. THE JOBS ACT FAILURE IS A FAILURE OF THE ADMINISTRATIVE STATE

A. SEC culture contributed to JOBS Act failures

Instead of scrapping the JOBS Act, a more fruitful analysis may explain why these exemptions underperformed. This task must begin with the legal authority and people who made the rules. The bureaucratic mindset is self-regarded, slow, ponderous, and risk averse.¹⁴⁵ Bureaucrats view themselves as ‘white hat’ protectors, defending the public from dodgy private-sector actors. This view pervades Western tradition.¹⁴⁶ But it did not originally ensconce the American project. It prevailed only after intense early 20th Century battles.¹⁴⁷ The thesis professed during the Progressive Era and accepted during the New Deal was modern life was too complex and its problems too complicated for legislators. A government of administration was needed, one staffed with apolitical technocrats.¹⁴⁸ In the decades since, these administrative-state features have rarely been questioned.¹⁴⁹ Administrative experts bathe in minutia. They disdain hard rules

¹⁴⁵ Burton Ltr., *supra* n. 23 at 14, n. 43 (collecting authority).

¹⁴⁶ Indeed, the morality of government actors traces from Plato (The Republic) and Aristotle (Politics) to the present, *see e.g.* Cass R. Sunstein & Adrian Vermeule, *The Morality of Administrative Law*, 131 HARV. L. REV. 1924 (2018), <https://harvardlawreview.org/2018/05/the-morality-of-administrative-law/>. *But see*, The Dubious Morality of Modern Administrative Law, by Richard A. Epstein (Manhattan Institute 2019).

Pestritto, *The Progressive Origins of the Administrative State: Wilson, Goodnow, and Landis*, 24 SOCIAL PHILOSOPHY AND POL’Y, 16-54 (2007), <https://www.cambridge.org/core/journals/social-philosophy-and-policy/article/progressive-origins-of-the-administrative-state-wilson-goodnow-and-landis/589946D8C35D97482D914D771EF73A56>.

¹⁴⁸ R. J. Pestritto, *The Birth of the Administrative State: Where It Came From and What It Means for Limited Government*, HERITAGE FOUNDATION, Nov. 20, 2007, at 4-5, (“[T]he fathers of progressive liberalism envisioned a delegation of rulemaking, or regulatory, power from congressional lawmakers to an enlarged national administrative apparatus, which would be much more capable of managing the intricacies of a modern, complex economy because of its expertise and its ability to specialize.”), <https://www.heritage.org/political-process/report/the-birth-the-administrative-state-where-it-came-and-what-it-means-limited>.

¹⁴⁹ *Mistretta v. United States*, 488 U.S. 361, 372 (1989), (“Our jurisprudence has been driven by a practical understanding that in our increasingly complex society, replete with ever changing and more technical problems, Congress simply cannot do its job absent an ability to delegate power under broad general directives.”) *Cf.* Gillian E. Metzger, *The Supreme Court, 2016 Term — Foreword: 1930s Redux: The Administrative State Under Siege*, 131 HARV. L. REV. 1, 7 (2017) (“[T]he administrative state today is constitutionally obligatory, given the broad delegations of authority to the executive branch that represent the central reality of contemporary national government. Those delegations are necessary given the economic, social, scientific, and technological realities of our day.”), <https://harvardlawreview.org/2017/11/1930s-redux-the-administrative-state-under-siege/>.

in favor of nuanced multi-factor analysis. This provides officials maximum flexibility and impedes courts from second guessing them.

Created as a direct response to the country's worst economic crisis, the SEC, perhaps more than any other agency, typifies the New Deal mindset.¹⁵⁰ This culture tracks the larger government mindset but is particularly pronounced given Commission prominence. Staff write prolix rules, reserve immense power for themselves, are skeptical of innovation, and distrustful of outsiders. Cultural hostility manifests through rules designed for established and familiar actors.¹⁵¹ Despite stated Commission belief its "rules and regulations should be drafted to enable market participants to clearly understand their obligations under the federal securities laws and to conduct their activities in compliance with law."¹⁵² And its aim to "promulgate rules that are clearly written, easily understood, and tailored toward specific ends."¹⁵³ Reality is different. Smaller issuers must traverse sprawling rules, many strewn with unweighted factors, that confuse even seasoned securities lawyers.

As Commissioner Hester Peirce stated in 2019, "Entrepreneurship and innovation do not have the happiest of relationships with regulation. Regulators get used to dealing with the existing players in an industry, and those players tend to have teams of people dedicated to dealing with regulators. . . . Regulators . . . tend to be skeptical of change because its consequences are

¹⁵⁰ Congress created the Commission under Section 4 of the Securities Exchange Act of 1934 [15 U.S.C. § 78d].

¹⁵¹ It must be remarked whatever regulatory burdens the SEC placed on registered companies, in the first two decades after the Securities Act, nonregistered issuers had fairly straightforward paths to capital. That changed starting in 1953. See, Cohn & Yadley, *supra* n. 4 at 25-28.

¹⁵² SEC, FISCAL YEAR 2018 CONG. BUDGET JUSTIFICATION ANNUAL PERFORMANCE PLAN, (2018 SEC Budget Request) at 22, <https://www.sec.gov/files/secfy18congbudgjust.pdf>.

¹⁵³ *Id.*

difficult to foresee and figuring out how it fits into existing regulatory frameworks is difficult.”¹⁵⁴

The Commission’s enforcement-first mindset further augurs resistance to innovation and outsiders. The SEC Enforcement Division has 1,400 Full Time Equivalent staff, more than any other.¹⁵⁵ The division’s FY 2019 budget request was its largest at almost \$532 million.¹⁵⁶ The Commission’s enforcement approach explains stocked personnel and massive budgets. Staff wrench each potential violation through “facts and circumstances” analysis.¹⁵⁷ This can mean intrusive years-long investigations that bleed companies dry. The Commission meets its stated goal to bring enforcement actions within two years of investigation starts barely half the time.¹⁵⁸ One securities lawyer described SEC investigations like “living in hell without dying.”¹⁵⁹ The Commission boasts (though in bureaucratic terms) of its power to bleed companies that may or may not have violated a law. “In addition to victories in the cases the agency brings to trial, the SEC’s litigation efforts also help the SEC obtain strong settlements in other cases by providing a credible trial threat and making it clear that the SEC will go deep into litigation and to trial, if necessary, in order to obtain appropriate relief.”¹⁶⁰

¹⁶⁰ 2018 SEC Budget Request, *supra* n. 152 at 35.

B. Overemphasis on Investor Protection Hurts Entrepreneurs and Curtails

Innovation

The Commission justifies its approach through laudable investor-protection goals. The Commission's mission is tripartite, to "protect investors, maintain fair, orderly, and efficient markets, and facilitate capital formation."¹⁶¹ But in practice, protecting investors always trumps its conflicting prongs.¹⁶² States go even further. Currently thirty conduct merit review or reserve the right to,¹⁶³ despite past glaring failures.¹⁶⁴

In balancing its conflicting mission, the Commission not only over-relies on investor protection but also one type. David Burton states four investor-protection ideas.¹⁶⁵ First is prosecuting fraud. This is a clear government function and securities regulation reifies antifraud. The second is providing potential investors with issuer background for informed decisions. This requires weighing useful disclosure to ensure company validity with issuer-bourne costs. It is worth noting Reg D has succeeded without mandatory disclosure.¹⁶⁶ Third is protecting investors from what regulators deem imprudent choices. The Commission does this by investment limits, barring unaccredited-investor opportunities, favoring certain exemptions through policy, and

¹⁶¹ SEC Mission Statement, <http://www.sec.gov/about/whatwedo.shtml#intro>. The statutory charge is "Whenever pursuant to this title the Commission is engaged in rulemaking and is required to consider or determine whether an action is necessary or appropriate in the public interest, the Commission shall also consider, in addition to the protection of investors, whether the action will promote efficiency, competition, and capital formation." See §3(f) of the Securities Exchange Act of 1934 and §2(b) of the Securities Act of 1933.

¹⁶² Professor Usha Rodrigues suggests political risk and lack of private-sector rewards reinforces Commission focus on investor protection. Rodrigues, *Dirty Secret*, *supra* n. 27 at 3396 ("[R]egulators' incentives are skewed against enlarging investment access in an area that (1) offers little for the rent-seeking regulator and (2) could cause average investors to lose their shirts."); *Id.* at 3397 ("[P]ublic choice theory suggests that the status quo may well continue: those who stand to benefit most are rationally uninterested, and the SEC would face political risk far outweighing reward were it to push for change.").

¹⁶³ See Regulation A Application for Coordinated Review, *supra* n. 84.

¹⁶⁴ Richard E. Rustin & Mitchell C. Lynch, *Apple Computer Set to Go Public Today: Massachusetts Bars Sale of Stock as Risky*, THE WALL ST. J., Dec 12, 1980, at 5, http://online.wsj.com/public/resources/documents/AppleIPODec12_1980_WSJ.pdf.

¹⁶⁵ Burton Ltr., *supra* n. 23 at 13.

¹⁶⁶ *But see* Becerra et al., *supra* n. 128 at 9 ("Rule 506/Reg D is often associated with fraudulent investment schemes, making exempt offerings under this category particularly risky.").

subjecting some exemptions to state-level registration and merit review. One Concept Release commenter put it colorfully, “It feels absurd that the average person can buy a \$5,000 wedding cake and sit down in front of the bakery to eat the whole thing in one sitting... BUT they cannot invest that same amount in a technology business. People make bad financial decisions every day: drive cars they can’t afford, blow their whole paycheck at the casino, have a \$50,000 wedding followed by a \$50,000 divorce a year later... and the law is silent!”¹⁶⁷ Fourth is protecting investors’ freedom to risk their money. This was and remains a major flaw in the Reg-D-centric regime the JOBS Act sought to change.

The latter two investor-protection concepts are dubious government functions. Protecting people from what regulators consider “bad” choices through either limits, “creeping federal merit review,”¹⁶⁸ or barred opportunities is paternalistic.¹⁶⁹ Regulators are naturally risk averse and have no special market acumen. Further, as explained below, private-ordering systems where large investors perform due diligence and retail investors join has worked elsewhere.

Mandatory disclosure has sturdier foundation but questionable utility. This is particularly true for small issuers and must be weighed against imposed costs. Disclosure has hallmarked federal securities law since the Commission’s advent. Congress championed it among policy alternatives.¹⁷⁰ Disclosure follows the aphorism ‘Sunlight is the best disinfectant.’ But it has nebulous empirical value. In fact, much scholarly disclosure research show no definitive

¹⁷⁰ de Fontenay, *supra* n. 143 at 474 (“Many options exist for regulating the offering and trading of securities. The federal securities laws introduced in the New Deal overwhelmingly favor one approach: mandatory disclosure, primarily by securities issuers themselves.”).

benefits.¹⁷¹ As former SEC Chair Mary Schapiro testified, “It is notoriously hard to quantify the benefits of any regulation. How do you quantify the benefits of preventing a fraud?”¹⁷² Scholars have criticized burdens on public companies for this difficult-to-quantify benefit.¹⁷³ Those companies can presumably absorb imposed costs. But it does not translate to smaller companies the JOBS Act tried to help.

Regulators have not balanced fraud-prevention goals with its impact on legitimate issuers and investors’ freedom to contract. No regulatory regime even in principle should aim to be completely free of fraud.¹⁷⁴ Costs are too high, and the goal contradicts human nature. And it has proven impossible despite the best intentions, decades of experience, and rules designed solely to prevent it.¹⁷⁵ Comparing Reg A+, Reg D, and Reg CF illustrates this. Critics point to

¹⁷¹ See, e.g., George J. Stigler, *Public Regulation of the Securities Markets*, 19 BUS. LAW. 721, 725 (1964) (examining the effects on new-issue stock returns before and after the SEC imposed mandatory disclosure); Cf. George J. ¹⁷⁵ Cohn & Yadley, *supra* n. 4 at 72, (“[E]xamination of the securities violations that are of principal concern reveals that no amount of technical exemption requirements will hinder the fraud artists from their endeavors. . . . Fraudulent and deceptive schemes have unfortunately continued unabated and independent of formal registration or exemption requirements.”).

questionable Reg A+ issuers in the first few years,¹⁷⁶ and state regulators complain about Reg D fraudsters.¹⁷⁷ Yet Reg A+ issuers undergo a thorough Commission-led qualification process to ensure adequate disclosure and accurate financial status. Reg D with the least oversight garners more capital than public markets—an impossibility if investors feared fraud. Reg CF has avoided substantive fraud accusations thus far¹⁷⁸ likely because portals are liable but as shown below private-ordered system function just as well.¹⁷⁹ Thus of the three exemptions, the most regulated had the highest proportion of questionable issuers. Yet not even the Commission shares critics gloomy view, noting the dearth of legal actions under Reg A+.¹⁸⁰ The contradiction should augur a reexamination of the current Commission balance between investor protection and individual and investor freedom.

C. SEC JOBS Act Hostility was Open and Straightforward

These factors: penchant for prolix rules, distrust of outsiders and innovation, and overemphasis on investor protection converged in the Commission’s hostile attitude to the JOBS Act.

Commissioners flaunted enmity from its start. While Congress debated, Chair Schapiro wrote the Senate Committee on Banking, Housing, and Urban Affairs concerned the act would subject investors to “fraudulent schemes designed as investment opportunities.”¹⁸¹ She specifically

deigned crowdfunding as lacking sufficient safeguards. In a later hearing Rep. Patrick McHenry (R-NC) described the letter as “being sideswiped by a regulatory body at the eleventh hour” and lamented the Chair hadn’t earlier addressed her concerns to the bill’s sponsors.¹⁸² Fellow Commissioner Luis Aguilar was forthright, “I cannot sit idly by when I see potential legislation that could harm investors. This bill seems to impose tremendous costs and potential harm on investors with little or no corresponding benefit.”¹⁸³ Commission opposition pervaded both drafting and implementation.¹⁸⁴ Edward Knight, Executive Vice President and General Counsel of NASDAQ, testified in a congressional hearing: “From the outset the SEC’s view of [equity crowdfunding] was they were not for this they and made it, shall I say, needlessly complicated and did not approach it except as this this was something where the public is going to get harmed and we need to narrow it as much as possible.”¹⁸⁵

D. Hostility to JOBS Act Innovations has Far-Reaching Consequences for the Future U.S. Economy

Commission hostility plagues more than Reg CF issuers raising small amounts. The JOBS Act is currently the best available emissary to the approaching token economy because it can meld network users and investors. Ongoing Commission grapples with token sales and blockchain thwart this potential. These innovations will never fit registered offerings and thus issuers must

use private exemptions. Bitcoin, the first public blockchain, emerged out of the 2008-2009 financial crisis. The first Initial Coin Offering (ICO)—selling crypto tokens that act as potential keys and currency on future blockchain ventures—occurred in 2013.¹⁸⁶ Yet digital assets so flummoxed the Commission, in 2018 it created a Senior Advisor for Digital Assets and Innovation post and filled it with career SEC bureaucrat Valerie Szczepanik.¹⁸⁷

After ICOs exploded in 2017, the Commission flooded issuers with subpoenas and enforcement actions. To be sure, many ICOs were frauds deserving prosecution.¹⁸⁸ Still, good-faith actors requested Commission guidance. The Commission spent at least six months¹⁸⁹ forming a 13-page “Framework for ‘Investment Contract’ Analysis of Digital Assets.”¹⁹⁰ But instead of clarifying, the document obfuscated. The guidance steeped numerous factors over already unclear direction. While the unsigned document reiterated prior Commission statements it would determine compliance via individual “facts and circumstances” grounded in the decades-old *Howey* test,¹⁹¹ it expounded further factors that conceivably could trap anything from baseball cards to premier liquors.¹⁹² Commissioner Peirce described the guidance as a “Jackson Pollock

¹⁹⁰ FRAMEWORK FOR “INVESTMENT CONTRACT” ANALYSIS OF DIGITAL ASSETS, SECURITIES AND EXCHANGE COMMISSION, Apr. 3, 2019, <https://www.sec.gov/files/dlt-framework.pdf>.

¹⁹¹ The *Howey* test, derives from *SEC v. W.J. Howey Co.*, 328 U.S. 293 (1946). It is the foundational case on whether nontraditional assets qualify as “investment contracts” and therefore fall under SEC domain.

¹⁹² JD Alois, *When Howey, the SEC & CorpFin Met Bourbon*, CROWDFUND INSIDER, May 29, 2019, <https://www.crowdfundinsider.com/2019/05/147688-when-howey-the-sec-corpfin-met-bourbon/>.

painting,” further explaining, “While *Howey* has four factors to consider, the framework lists 38 separate considerations, many of which include several sub-points. A seasoned securities lawyer might be able to infer which of these considerations will likely be controlling and might therefore be able to provide the appropriate weight to each. . . . I worry that non-lawyers and lawyers not steeped in securities law and its attendant lore will not know what to make of the guidance.”¹⁹³

The confusion should not surprise given Ms. Szczepanik’s disposition. When queried she stated, “The lack of bright-line rules allows regulators to be more flexible.”¹⁹⁴ She later opined ‘prescriptive rules’ may allow sneaky entrepreneurs to evade law.¹⁹⁵ From the entrepreneur standpoint this creates worry. First Commission “flexibility” under years-long investigations and “facts and circumstances” analysis may benefit regulators but destroys companies exploring new technologies and ideas. Unweighted multi-factor analyses that leave even Commissioners guessing lends itself not to law but relationships. Clear rules and open competition, not which law firm hires former regulators should dictate market winners.

When innovative companies try following the rules, Commission “flexibility” leads to legal limbo and obscene bills. During the 2017 ICO craze Blockstack’s approach was different. Blockstack is a decentralized platform trying to create a more user-controlled and directed

¹⁹³ Hon. Hester M. Peirce, SEC Comm., Speech, How We *Howey*, Securities Enforcement Forum, (E. Palo Alto, Cal., May 9, 2019) by video, <https://www.sec.gov/news/speech/peirce-how-we-howey-050919>.

¹⁹⁴ Brady Dale, *SEC’s Valerie Szczepanik at SXSX: Crypto ‘Spring’ Is Going to Come*, COINDESK, May 16, 2019, <https://www.coindesk.com/secs-valerie-szczepanik-at-sxsw-crypto-spring-is-going-to-come>.

¹⁹⁵ Valerie Szczepanik, Address, ACT-IAC 2018 Blockchain Forum (Apr. 3, 2018), quoted in Kik Wells Submission, *In re Kik Interactive* (HO-13388), (Nov. 16, 2018) at 30, https://cdn.crowdfundinsider.com/wp-content/uploads/2019/02/Kik-wells_response.pdf. This sentiment pervades the SEC. See Manuel F. Cohen & Joel J. Rabin, *Broker-Dealer Selling Practice Standards: The Importance of Administrative Adjudication in Their Development*, 29 LAW & CONTEMP. PROBS. 691, 699 (1964) (noting twenty-two rules issued by the Securities and Exchange Commission but denying that the Commission has “sought to develop a group of rules to comprehend all, or even most, fraudulent practices.”).

internet through blockchain, decentralized applications, and a tokenized ecosystem.¹⁹⁶ Instead of testing Commission resolve or wrangling with the *Howey* test, Blockstack ensured compliance through Reg A+. The qualification process reportedly took 10 months and cost \$2.8 million in legal fees.¹⁹⁷ It cost more than the average IPO for issuers with revenue less than \$100 million.¹⁹⁸ While “bleeding edge” companies can expect higher costs, six-seven figure compliance budgets will remain unviable for all but the most well-funded startups. And Blockstack’s qualification does not end potential liability. It plans to stop reporting once “Stacks Tokens” are fully decentralized,¹⁹⁹ as SEC Director of Corporate Finance Bill Hinman approved in theory.²⁰⁰ But should SEC staff decide “facts and circumstances” dictate prolonged reporting it could sue Blockstack and kill the project.

VI. THE PROPOSED RULES WILL NOT REVIVE THE JOBS ACT OR ENCOURAGE THE FUTURE TOKEN ECONOMY

The Commission’s Proposed Rules expose its lack of imagination and boldness. The Proposed Rules repeatedly fall short despite some welcome steps such as higher overall and individual limits. The Commission even mars outwardly promising changes with the incrementalism. In the years since President Obama described JOBS Act provisions as “game changers,” the Commission has proven incapable of fostering its lofty goals. Indeed, even if the Commission

adopted every proposal as is, impact would likely be slight. And like the JOBS Act, commenters would years later diagnose its failure. The Proposed Rules are a microcosm of why Congress must act.

Strikingly, the Commission avers—allegedly satisfied by Concept Release commenters—that major changes are unnecessary.²⁰¹ Some exemptions like Reg D work well. But recalling the JOBS Act goals of expanding investor wealth opportunities and capital options for underserved entrepreneurs, the exemptions falter. The Proposed Rules do not substantively address these goals.²⁰²

A second theme is Commission belief it can solve underuse by raising overall or individual limits. From a relative standpoint these moves lower capital costs. But they do not address underlying issues that plague exemptions save Reg D. Only rarely in the Proposed Rules 341 pages does the Commission recognize its own or states' rules as hardships. And any movement toward relaxing those rules is cautious and halting—a movement befitting the Commission's New Deal pedigree but misaligned with modern capital raising.

Proposed Rule 241 is emblematic.²⁰³ Piggybacking on Regulation A Rule 255, Rule 241 proposes exempting issuers generally soliciting interest before committing to a particular exemption. This rule could help novice issuers and those living outside areas concentrated with securities lawyers or angel networks. Discerning appetite for a raise and addressing investor concerns beforehand could tighten issuer planning and focus. All receivers of these solicitations

²⁰¹ Proposed Rules, *supra* n. 1 at 9 and n.15 collecting supporting comments. (“[A] consistent theme . . . was that many elements of the current structure work effectively and a major restructuring is not needed.”).

²⁰² According to SEC data Regulation A and Regulation CF along with Rule 504 account for only 0.1% of private capital raised through exemptions. Regulation D 506(c) part of the JOBS Act boosts this total but only minimally, *see* Proposed Rules, *supra* n. 1 at 115.

²⁰³ For Rule 241 exact wording *see* Proposed Rules, *supra* n. 1 at 304-305.

would be offerees for federal antifraud law.²⁰⁴ Rule 241 also includes logical criteria like legends, no acceptance of funds, and no binding commitments.²⁰⁵ But if approved Rule 241 is dead on arrival because it allows Blue Sky laws.²⁰⁶ If from nothing else, the Commission should have learned from its Reg A+ Tier 1 experiment, issuers will rarely suffer state-level processes. The Commission's proposed "Demo Days" exemption also shows its chary approach. Demo Days are sponsored events where founders discuss their companies with potential investors. After years of questions about whether these events invoke dreaded general solicitation, the Commission addressed the issue. To be sure, after endless handwringing clarification is welcome. But as proposed the rules may provide issuers and lawyers trouble. The Commission defines a discrete set of forums exempt from general solicitation. Specifically, the exemption would cover "a seminar or meeting by a college, university, or other institution of higher education, a local government, a nonprofit organization, or an angel investor group, incubator, or accelerator sponsoring the seminar or meeting."²⁰⁷ It then defines "angel investor groups."²⁰⁸ It also bans sponsor recommendations or negotiations, limits sponsors to "reasonable administrative fees," and limits how sponsors may advertise these events.²⁰⁹ The Commission describes this as a "tailored approach." Time will tell how workable it is, but Commission efforts to police human interaction with the precision of a fitted suit are foreboding.

A. Proposed Rules for Regulation D 506(c)

The proposed Reg D 506(c) changes again typify Commission plodding. The Commission realizes Reg D 506(c) has disappointed and proffers why: (i) the principles-based methodology for “reasonable steps” heaps uncertainty on issuers fearful regulators will deem their steps “unreasonable”; and (ii) the non-exhaustive documents list has privacy concerns.²¹⁰ The Commission admits the list, as the only surefire way to avoid “facts and circumstances” inquiries, “may be creating uncertainty for issuers and inadvertently encouraging [them] . . . to rely only on the non-exclusive list.”²¹¹ In Commission fashion, after years’ experience, it proposes slight progress by adding investors may declare themselves accredited on subsequent raises after previous verification.²¹²

B. Proposed Rules for Regulation A+

The most important Reg A+ proposal is to raise the offer limit to \$75 million.²¹³ This marks the first time the Commission upped the limit Congress requires it to review biennially.²¹⁴ Other proposed Reg A+ changes involve redacting confidential information from certain Form 1-A

²¹⁰ Ltr. from Tom Quaadman, Executive Vice President, Chamber of Commerce Center for Capital Markets Competitiveness to the SEC on the Concept Release (Sept. 24, 2019) (Chamber Ltr.) at 5 (“In practice, the enhanced accredited investor verification requirements have discouraged many issuers from taking advantage of Rule 506(c), and issuers continue to rely primarily on the Rule 506(b) exemption, which continues to prohibit general solicitation.”), <https://www.sec.gov/comments/s7-08-19/s70819-6193319-192490.pdf>; Cf. Manning G. Warren, *The Regulatory Vortex for Private Placements*, 45 SECS. REG. L.J. 9 (2017), (discussing chilling effect Reg D 506(c) requirements to turn over sensitive documents.), https://papers.ssrn.com/sol3/papers.cfm?abstract_id=3037492; Ltr. from Patrick Gouhin, CEO et al., Angel Capital Association, to the SEC on the Concept Release (Sept. 23, 2019) at 5 (“Many angels view getting a three-month certification from a third party as being expensive and time-consuming and a major risk in terms of sensitive personal and financial data.”), <https://www.sec.gov/comments/s7-08-19/s70819-6170303-192393.pdf>.

exhibits instead of having to apply beforehand.²¹⁵ And technical amendments to smooth the filing process.²¹⁶ These will likely have little adoption effect.

C. Proposed Rules for Regulation Crowdfunding

The biggest disappointment is Reg CF. The Proposed Rules do make progress. For example Reg CF issuers can ‘test the waters’ before filing the legal document, Form C.²¹⁷ The SEC would require these solicitations to disclaim the inability to accept funds until filing and the offer’s nonbinding nature.²¹⁸ But importantly, because Reg CF offers are “covered” under 15 U.S.C. § 77r(b)(4)(c), Blue Sky laws are preempted.²¹⁹ This change should benefit novice issuers or those living outside entrepreneurial hotspots. Issuers must choose Reg CF beforehand to avoid Proposed Rule 241 state processes. The Proposed Rules also helpfully clarify issuers may discuss offers orally after filing if they follow Rule 204 proscriptions.²²⁰ But inexperienced issuers must still navigate confusing rules about “terms” and “nonterms.”²²¹

Raising the aggregate offer limit from \$1.07 million to \$5 million also helps. Although this contradicts the statute, the Commission proposed using its general exemptive authority under Securities Act Section 28.²²² For individual limits, Congress hamstrung the Commission with confusing text. But the Commission further clouded the situation by using “lesser of” instead of “greater of” the ambiguous statutory formula and not exempting accredited investors. The Commission now seeks to remedy this by exempting accredited investors and using “greater of”

²¹⁵ Proposed Rules, *supra* n. 1 at 106-108.

²¹⁶ These include changes to how issuers make nonpublic correspondence public via EDGAR, the SEC database, incorporating by reference previously filed financial statements in Form 1-A, and an amendment to the abandonment provision of Regulation A, Rule 259(b) [17 C.F.R. § 230.259(b) (2019)]. *Cf. infra* n. 276.

²¹⁹ 15 U.S.C. § 77r(a)(2)(A) (2018).

²²⁰ Proposed Rules, *supra* n. 1 at 84-85, *Cf.* 17 C.F.R. § 227.204 (2019).

²²¹ 17 C.F.R. § 227.204 (2019).

²²² Proposed Rules, *supra* n. 1 at 131.

for unaccredited investors.²²³ While welcome unaccredited investor limits are still confusing and unenforceable.

Unfortunately, other Proposed Rules will likely have little impact despite positive baby steps. Others restrict issuer and investor choices for little benefit. First are the long clamored for Special Purpose Vehicles (SPVs). Securities Act Section 4A(f)(3) prevents “investment companies” that invest in a single company (SPVs) from participating in Reg CF.²²⁴ In theory, SPVs could ease regulatory burdens for Reg CF issuers by cabining all Reg CF investors in a separate legal entity. Concerns focus on unwieldy numbers of record holders on issuers’ capitalization tables for the 12(g) Rule and other administrative hurdles linked to unaccredited investors. From the start government and market actors recognized how disallowing SPVs would thwart Reg CF growth.²²⁵ In response, the SEC proposed crowdfunding SPVs, that would channel all Reg CF investors into one bucket.²²⁶ But in typical fashion, the proposal’s rule-heavy approach may kill this innovation before it flourishes.

While the proposed rule purports to solve the capitalization table and 12(g) Rule issue, the Commission larded in investor protections that may retard use. The Commission states crowdfunding SPVs “would serve merely as a conduit for investors to invest in a single underlying issuer.”²²⁷ The Commission design “allows investors in a crowdfunding vehicle to achieve the same economic exposure, voting power, and ability to assert state and federal law rights, and receive the same disclosures under Regulation Crowdfunding, as if they had invested

²²³ *Id.* at 133-135.

²²⁴ The Commission currently prevents issuers from using SPVs because of the prohibitions in the Investment Company Act Section 4A(f)(3) of the Securities Act [17 C.F.R. § 227.100(b)(3) (2019)].

²²⁵ See Proposed Rules, *supra* n. 1 at 140-144.

²²⁶ See Proposed Rule 3a-9 under the Investment Company Act, Proposed Rules, *supra* n. 1 at 144.

²²⁷ *Id.*

directly in the underlying issuer . . .”²²⁸ This includes each investor’s ability to “direct the crowdfunding vehicle to assert the rights under state and federal law that the investor would have if he or she had invested directly in the crowdfunding issuer.”²²⁹

Reports on the proposal are worrisome. As currently envisioned, one raise may require multiple SPVs. The proposed SPV also saddles the issuer with cost burdens, substantially increasing upfront outlays for an already expensive option. Even with proxies, the need to gain permission from SPV security holders for transactions will cost time and money. There are also additional disclosure obligations and questions about who will manage SPVs and distribute required paperwork.²³⁰ These issues may obstruct crowdfunding SPV use.

Moreover, the Proposed Rules retreat on some issues. For instance, Reg CF currently does not restrict security type. Some issuers have offered nontraditional securities such as Simple Agreements for Future Equity (SAFE), token instruments, and revenue shares. The Commission frets this “could” harm investors, “may” create confusion, and thus “could” lead to investor dissatisfaction.²³¹ The Commission offers no proof any actual confusion or dissatisfaction exists²³² and does not grapple with the issuer benefit of simpler instruments. It only proffers crowdfunding SPVs may alleviate desire for nontraditional instruments. The proposal states this restriction aligns with available Reg A+ options.²³³ But this is opposite the approach it should

²³³ Pub. L. No. 112-106, sec. 401(b)(3), 126 Stat. 324 [15 U.S.C. § 77c(b)(3) (2018)] [17 C.F.R. § 230.261(c) (2019)].

take. Crowdfunding along with blockchain and the emerging token economy represent potential paradigm shifts towards decentralized economic governance. It is unclear why SAFEs which emerged in Silicon Valley,²³⁴ token sales, which despite regulatory resistance are inevitable, and revenue shares, which can yield immediate investor returns are beyond ordinary Americans' grasp.

VII. FIXING THE JOBS ACT

The JOBS Act has not reached its promise. Geographic and demographic disparities remain in who gets funded and who profits. Uncertainty also persists in Commission approaches to the JOBS Act role in tokenized structures. After eight years and a complete private-exemption framework review the Commission has few answers. Commissioners pay lip service to problems but overemphasis on investor protection, insistence on “fact and circumstances” analysis, and a lumbering bureaucracy thwart progress.

A. *Lessons from Overseas*

The United States is not alone in grappling with new capital-raising methods, token economics, and disruptions to calcified monetary systems. In aligning America's entrepreneurial ambitions with changing global dynamics, we can see what works elsewhere and adapt our rules. Fulbright Scholar and University of Colorado professor Andrew Schwartz has researched equity crowdfunding models.²³⁵ His New Zealand study is particularly useful because it copied Regulation Crowdfunding yet stripped it of obstacles domestic entrepreneurs face.²³⁶ The result

²³⁴ Michael Carney, *Y Combinator introduces safe, a new early stage funding structure. Promises all the good of convertible notes, none of the bad*, PANDO, Dec. 6, 2013, <https://pando.com/2013/12/06/y-combinator-introduces-safe-a-new-early-stage-funding-structure-promises-all-the-good-of-convertible-notes-none-of-the-bad/>.

²³⁵ Ltr. from Prof. Andrew Schwartz, U. of Col. to the SEC on the Concept Release (Sept. 24, 2019), <https://www.sec.gov/comments/s7-08-19/s70819-6193349-192506.pdf>.

²³⁶ Andrew Schwartz, *Equity Crowdfunding in New Zealand*, 2018 NEW ZEALAND L. REV. 243 (2018).

has been spectacular. Scaled for economy and focusing on the first year, New Zealand had thirteen times more crowdfunding campaigns and raised thirty times more capital. And did so without any reported fraud. Even accounting for Reg CF's healthy year-to-year growth and other available options for U.S. entrepreneurs, New Zealand's model is notable. New Zealand focuses on private ordering where portals and lead investors take responsibility for issuer quality. Reputational awareness and financial skin-in-the-game self-regulate the system without equivalents of Form Cs, Annual Reports, individual limits, or offer regulation.²³⁷

While New Zealand's model may be too radical for the current Congress it presents a striking alternative to the rule-heavy U.S. approach. Yet it is not only from this small country we can learn. The U.K. with a comparable financial system has also succeeded. According to the 2019 SEC Regulation Crowdfunding Report²³⁸ in 2017 alone U.K. equity-crowdfunding issuers raised \$450 million, "significantly higher" than Reg CF's first two-and-half-years. The SEC cautions about comparisons because of "differences in regulatory regimes and tax treatments of crowdfunding securities investments."²³⁹ One difference is the U.K. "Regulatory Sandbox." Sandbox tools include "restricted authorization, individual guidance, informal steers, waivers and no enforcement action letters."²⁴⁰ Within its first two years the Sandbox accepted 89 firms with innovative products. According to an outside report, "The unequivocal message is that the sandbox has delivered real value to firms, ranging from guidance relating to the application of regulation to innovative propositions, to 'kicking the [tires]' on the risks relating to their business

²³⁷ Professor Schwartz notes Australia has a flat individual limit of \$5,000 instead of the clunky Regulation CF formula, which avoids privacy concerns and is straightforward. Schwartz Ltr., *supra* n. 235 at 5.

²³⁹ *Id.* at 16-17.

²⁴⁰ FCA Regulatory Sandbox, <https://www.fca.org.uk/firms/innovation/regulatory-sandbox>.

model.”²⁴¹ It recently announced a partnership with the City of London Corporation to support firms addressing the COVID-19 challenge.²⁴² Commissioner Peirce has proposed the same concept, though with less hands-on government guidance for U.S.-based token projects.²⁴³ While this regulatory originality may or may not work for domestic firms, the U.K. embrace of innovation is in short supply across the Atlantic.

B. Regulators must Heed Private Exemptions Costs

Currently, and presuming the Commission approves the Proposed Rules as is, the costs of forgoing Reg D for retail-investor raises are infeasible for most issuers. Reg A+ and Reg CF costs dwarf private-ordered Reg D. Reg A+ estimates range from lower six figures to well into seven figures.²⁴⁴ In relative costs, Reg CF is potentially worse. The Commission estimates average Reg CF campaigns cost almost \$22,500 and 241 manhours.²⁴⁵ Reg D 506(c) is not only

²⁴¹ A journey through the FCA regulatory sandbox, The benefits, challenges, and next steps, DELOITTE, (2018) at 2, <https://www2.deloitte.com/content/dam/Deloitte/uk/Documents/financial-services/deloitte-uk-fca-regulatory-sandbox-project-innovate-finance-journey.pdf>.

more costly than Reg D but invites substantial privacy concerns.²⁴⁶ In fact, the Wefunder portal returned to Reg D after Reg D 506(c) compliance headaches.²⁴⁷ In examining how to bring Reg D opportunities to all, cost of capital must be paramount.

C. *Where Congress Should Act*

In our deeply polarized time, the JOBS Act convened supporters across ideological and partisan lines to help America's overlooked entrepreneurs. Unfortunately, one constituency not on board was the Securities and Exchange Commission. The results speak for themselves. It is Congress's duty to intervene before another lost decade occurs. A JOBS Act sequel can succeed where the first failed by adhering to a few key insights. First the Commission will not fix the JOBS Act *sua sponte*. The Proposed Rules show that. Second, Congress should trust citizens to make investment choices as they do other life choices. This means allowing options that fit their

Report) at 40, (“[M]arket participants have expressed concerns about the cost and complexity of using crowdfunding compared to private placement offerings.”), <https://www.treasury.gov/press-center/press-releases/documents/a-financial-system-capital-markets-final-final.pdf>; Ltr. from David V. Duccini, Founder & CEO Silicon Prairie Holdings, Inc., to the SEC on the Concept Release (Sept. 24, 2019) (Silicon Prairie Ltr.) at 8, <https://www.sec.gov/comments/s7-08-19/s70819-6184555-192415.pdf> (“REG-CF is literally the MOST EXPENSIVE cost of capital option.”); Campbell Ltr., *supra* n. 50 at 21, (“The costs of ex ante and ex post disclosures of investment information and the costs of the limitations on reasonable marketing strategies (i.e., limiting selling strategies to posting offers on third party websites) overwhelm the value of the Crowdfunding exemption for small businesses.”); Schwartz Ltr., *supra* n. 235 at 2, (“By imposing significant disclosure and regulatory hurdles, Regulation Crowdfunding imposes high costs on issuers relative to the low level of funding startups can and do obtain, dissuading issuers from relying on the exemption.”).

²⁴⁶ Proposed Rules, *supra* n. 1 at 87-88; *Cf.* Ltr. from Anthony Chereso President & CEO, Institute for Portfolio Alternatives, to the SEC on the Concept Release (Sept. 24, 2019) at 4 (discussing privacy concerns and fear of rescission long after raise with principle-based verification method.), <https://www.sec.gov/comments/s7-08-19/s70819-6193369-192518.pdf>; Chamber Ltr., *supra* n. 210 at 5 (“In practice, the enhanced accredited investor verification requirements have discouraged many issuers from taking advantage of Rule 506(c)); Burton Ltr., *supra* n. 23 at 35 (“Many investors are reluctant to provide such sensitive information to issuers with whom they have no relationship as the price of making an investment and, given the potential liability, accountants, lawyers and broker-dealers are unlikely to make certifications except perhaps for very large, lucrative clients.”); Ltr. from Stuart M. Rigot, Esq., Wyrick Robbins LLP, to the SEC on the Concept Release (Sept. 17, 2019) at 3 (“[S]ophisticated funds and/or high net-worth angel investors are very much reluctant to share sensitive financial information, whether about themselves or their limited partners.”), <https://www.sec.gov/comments/s7-08-19/s70819-6132204-192257.pdf>.

²⁴⁷ Ltr. from Nicholas Tommarello CEO, Wefunder, to the SEC on the Concept Release (Sept. 13, 2019) (Wefunder Ltr.) at 13 (also noting about 10% of accredited investors dropped out of potential investments because of the verification hassles, even if they had previously verified the year before.), <https://www.sec.gov/comments/s7-08-19/s70819-6132124-192256.pdf>.

budgets, aspirations, and risk tolerance subject to federal antifraud law. As Professor Usha Rodrigues aptly states, “Securities law . . . in theory, as in practice, marginalizes the average investor without acknowledging that it does so, let alone justifying it.”²⁴⁸ Third, states should not conduct additional reviews or require fees that do not protect investors but harm entrepreneurs.

Regulate sales not offers. Offer regulation has hallmarked U.S. securities law since its federalization.²⁴⁹ The Commission interprets offers broadly and beyond common-law understandings.²⁵⁰ That offers, in effect, *speech* can harm potential investors, even those not investing is a uniquely American concept.²⁵¹ And its repeal has been bandied since at least the 1990s.²⁵² No one is harmed by receiving investment opportunities²⁵³ and that speech is still subject to federal antifraud law. Speech policing factual information ties issuers and their

²⁵³ Crowdcheck Ltr., *supra* n. 251 at 2; Ltr. from Robert E. Buckholz Chair, Federal Regulation of Securities Committee ABA Business Law Section to the SEC on the Concept Release, (Oct. 16, 2019) (ABA Ltr.) at 4 (“Although the Securities Act regulates offers and sales, true damage rarely occurs unless there is an actual sale.”), <https://www.sec.gov/comments/s7-08-19/s70819-6297110-193413.pdf>; Burton Ltr., *supra* n. 23 at 9 (“An offeree that never buys a security needs little ‘protection.’”); Barker Ltr., *supra* n. 167 (“[I]nvestors need protection, but that belongs at the point-of-sale.”); Ltr. from Georgia Quinn, General Counsel, Coinlist to the SEC on the Concept Release (Sept. 26, 2019) (Coinlist Ltr.) at 6 (“Instead of system of potential foot faults, issuers should be able to communicate broadly as long as before investing, potential investors are directed to the intermediary with appropriate education and risk disclosures.”), <https://www.sec.gov/comments/s7-08-19/s70819-6220398-192608.pdf>; Campbell Ltr., *supra* n. 50 at 10 (“Issuers should be allowed and, indeed, encouraged to solicit broadly for investors, so long as the investor protection condition is imposed at sale.”).

lawyers in knots, ups legal bills, and foments less information. This is true even for Reg D where general solicitation squabbles spur angst, stalled raises, and minutia-level speech parsing.²⁵⁴

Less experienced Reg CF issuers and investors are especially vulnerable. Regulating speech between these parties for small-dollar amounts and often where prior relationships exist runs counter to the crowdfunding model,²⁵⁵ as well as Reg CF's goal to democratize private investing.²⁵⁶ Offer proscriptions not only harm Reg CF issuers pre-raise but also during, limiting communications outside portals to nondescript 'tombstone' ads.²⁵⁷ This confuses novice issuers and investors alike and factors into Reg CF's soft start.²⁵⁸ The rules force even knowledgeable issuers into vagaries and weasel words lest they trip the "terms" – "nonterms" dichotomy.²⁵⁹

²⁵⁴ Chamber Ltr., *supra* n. 210 at 5, ("Determining what activities constitute general solicitation or general advertising has been an area of uncertainty for years. . . . the Staff's guidance has been inconsistent at times and still leaves open a number of compliance uncertainties."); Ltr. from Maria Wolvin, Vice President & Sr. Counsel, Public Policy, Association for Corporate Growth to the SEC on the Concept Release (Sept. 24, 2019) at 6, ("[Those] seeking to undertake a Rule 506(b) offering [must] either navigate a host of SEC No Action Letters, staff guidance and enforcement activity, or expend resources to retain outside counsel to determine the parameters of prohibited and permissible activities under Rule 506(b)."), <https://www.sec.gov/comments/s7-08-19/s70819-6190715-192477.pdf>; Crowdcheck Ltr., *supra* n. 251 at 5 (unfamiliarity with general solicitation nuances, "leads to pointless arguments between issuer and counsel as to what the issuer hopes to achieve with the communications they are making, and frantic efforts to 'fix' communications that the issuer has made without realizing the light in which the communication may be viewed by regulators."); Ltr. from James P. Dowd, CEO, North Capital Investments Technology to the SEC on the Concept Release (Sept. 24, 2019) (North Capital Ltr.) at 2 (describing decades-long issues with when an investor relationship is sufficiently "preexisting" and "substantive" to avoid general solicitation.), <https://www.sec.gov/comments/s7-08-19/s70819-6193359-192511.pdf>.

²⁶¹ Mercatus Ltr., *supra* n. 173 at 5 (“The federal securities laws were meant to increase the flow of accurate information and not to protect investors in a paternalistic way from potentially bad investments. . . . Investor protection was the spirit of the federal securities laws, but it was protection consistent with the country's history and tradition of freedom and self-reliance.”).

²⁶² U.S. Const. amend. I.

²⁶³ North Capital Ltr., *supra* n. 254 at 4 (“Simply put, without federal preemption, secondary markets for exempt securities are dead before launch. They will be crippled by the high cost of compliance. The failure of Reg A / Tier 1 offers convincing evidence of this point.”); Burton Ltr., *supra* n. 23 at 38, (discussing unattractiveness of Reg A+ because the lack of Blue Sky preemption in the secondary trading market means “investors have no cost-effective means of selling their investment.”); Crowdcheck Ltr., *supra* n. 251 at 47 (“[T]he patchwork of rules applying to [Reg A+] issuers and brokers facilitating secondary transactions makes secondary liquidity excessively expensive and unavailable to many small issuers. This poses a harm to investors as well, as they do not have any real opportunity for liquidity until an issuer is listed on a national securities exchange.”).

²⁶⁴ Ltr. from Mark Schonberger, Goodwin Proctor LLP, to the SEC on the Concept Release (Sept. 24, 2019) (Goodwin Proctor Ltr.) at 9 (“Public policy suggests that impairing liquidity of securities does not protect investors.”), <https://www.sec.gov/comments/s7-08-19/s70819-6193382-192525.pdf>; McHenry Letter, *supra* n. 259 at 7 (“The liquidity provided by a secondary market is an investor protection in and of itself, because it would allow individuals whose financial situation has changed to exit these investments in times of need.”).

Regulation A securities.²⁶⁵ But it refuses to act despite habitual cajoling both inside²⁶⁶ and outside government.²⁶⁷ If Reg A+ and Reg CF are to emerge from novelty stage and counter Reg D dominance, Congress must cover resales. It is telling that well before the JOBS Act, the Commission had broad authority to “cover” securities to “Qualified Purchasers” which it could freely define, limited only by investor protection and public interest.²⁶⁸ Congress even amended Securities Act Section 2(b) to make the Commission “consider, in addition to the protection of investors, whether the action will promote efficiency, competition and capital formation.”²⁶⁹ A

²⁶⁵ The Court of Appeals in the *Lindeen v. SEC*, 825 F. 3d 646 (D.C. Cir. 2016) confirmed the breadth of this delegation to the Commission to preempt state registration authority over Regulation A+ offerings.

²⁶⁶ ADVISORY COMMITTEE ON SMALL AND EMERGING COMPANIES: RECOMMENDATIONS REGARDING SECONDARY MARKET LIQUIDITY FOR REGULATION A , TIER 2 SECURITIES, (May 15, 2017) (recommending Commission preempt from state regulation the secondary trading in securities of Tier 2 Regulation A issuers current in their ongoing reports.), <https://www.sec.gov/info/smallbus/acsec/acsec-recommendation-051517-secondary-liquidity-recommendation.pdf>; FINAL RPT. OF THE 2019 SEC GOVERNMENT-BUSINESS FORUM ON SMALL BUSINESS CAPITAL FORMATION (Aug. 2019) at 10, (same) <https://www.sec.gov/files/small-business-forum-report-2019.pdf>; 2018 Forum Report, *supra* n. 35 at 21 (same); FINAL RPT. OF THE 2017 SEC GOVERNMENT-BUSINESS FORUM ON SMALL BUSINESS CAPITAL FORMATION (Mar. 2018) at 17 (recommending Commission preempt Blue Sky laws for secondary trading of securities issued under Tier 2 of Regulation A and consider overriding advance notice requirements and limit fees.), <https://www.sec.gov/files/gbfor36.pdf>, FINAL RPT. OF THE 2016 SEC GOVERNMENT-BUSINESS FORUM ON SMALL BUSINESS CAPITAL FORMATION (Nov. 2016), at 16 (recommending preempting all secondary sales of Reg A+ Tier 2.), <https://www.sec.gov/info/smallbus/gbfor35.pdf>; FINAL RPT. OF THE 2015 SEC GOVERNMENT-BUSINESS FORUM ON SMALL BUSINESS CAPITAL FORMATION (Nov. 2015) at 23 (Same for issuers that have satisfied for the past two years and are current in their reporting obligations.), <https://www.sec.gov/info/smallbus/gbfor34.pdf>; FINAL RPT. OF THE 2014 SEC GOVERNMENT-BUSINESS FORUM ON SMALL BUSINESS CAPITAL FORMATION (May 2015) at 29 (Same and including Tier 1), <http://www.sec.gov/info/smallbus/gbfor33.pdf>; Treasury Report, *supra* n. 245 at 40 (recommending state securities regulators update their regulations to exempt from state registration and qualification requirements secondary trading of securities issued under Tier 2 of Regulation A or alternatively that the Commission use its authority to preempt state registration requirements for such transactions.). Unfortunately, this is not a new development. *See* Cohn & Yadley, *supra* n. 4 at 3-4, (“The Small Business Forum, mandated by Congress as an annual SEC event, has resulted in 25 years of repeated and strongly-worded recommendations from small business advocates to lessen the SEC's regulatory burdens on raising capital. Yet, with rare exception, the SEC has turned a deaf ear to the Forum's recommendations and concerns.”).

²⁶⁷ *See supra* n. 86 (collecting support in Regulation A Release), *Cf. Burton Ltr.*, *supra* n. 23 at 38 (Reg A+ has been a disappointment because of two Commission decisions, “Probably the most important reason was the Commission’s decision to not preempt Blue Sky laws for Tier 1 offerings or Tier 2 secondary offerings.”); North Capital Ltr., *supra* n. 254 at 3, (“Simply put, without federal preemption, secondary markets for exempt securities are dead before launch.”); Goodwin Proctor Ltr., *supra* n. 264 at 9, (“[T]he pre-emption of state laws with respect to resales of Tier 2 offerings needs to be reviewed and addressed.”); Coinlist Ltr., *supra* n. 253 at 5 (Blue Sky preemption would make Reg A+ Tier 2 more workable.); Crowdcheck Ltr., *supra* n. 251 at 47 (same); Campbell Ltr., *supra* n. 50 at 15 (“The failure of the Commission to preempt, to the full extent of its Congressionally delegated power, state registration authority has been a significant failure on the part of the Commission.”).

²⁶⁸ Section 18(b)(3) of the 1933 Act (NSMIA) (1996) [15 U.S.C. § 77r(b)(3) (2018)].

²⁶⁹ 15 U.S.C. § 77b(b) (2018).

quarter century hence, the Commission has not materially acted without Congressional mandate.²⁷⁰

Secondary trading also has massive future implications. Blockchain-based endeavors and tokenized systems are incompatible with state-by-state secondary-trading regimes.²⁷¹ As tokens express multiple uses acting as network keys, as well as having currency and security traits, it is imperative states with their stifling and dissonant rules cannot interfere. While some states have sought to brand themselves blockchain havens²⁷² others cannot even define the term.²⁷³ Little reason exists to think this ineptitude will dissipate as technology advances and digital assets acquire more and varying functions.

Preempt state filing requirements and notice fees for Regulation A+ and Regulation

Crowdfunding. State filing and notice fees serve no cognizable purpose. They do not protect investors, facilitate capital, or improve markets. They are regressive, expensive, and disproportionately hurt smaller issuers.²⁷⁴ Reg A+ fees are littered with waste, inconsistencies, and timing issues, with no related benefit.²⁷⁵ This model departs from Reg D, where issuers

²⁷⁰ Campbell, *Under the Bus*, *supra* n. 83 at 348 (describing Commission’s decades-long failure to expand preemption over exempt offerings “even as states’ registration obligations have continued to choke small business capital formation and wreck the Commission’s rational, efficient exemptions from federal registration.”); *Id.* at 350 (“Indeed, a moment of reflection reveals that the only preemptions of state authority over exempt offerings by small businesses have been the result of statute, specifically the preemption over Rule 506 offerings and crowdfunding.”).

²⁷¹ Goodwin Proctor Ltr., *supra* n. 264 at 9-10, (discussing Reg A+ potential for blockchain-related endeavors.).

²⁷⁴ Pittsburgh Equity Ltr., *supra* n. 255 at 2, (discussing burden of filing requirements and fees on Reg CF issuers.).

²⁷⁵ Barker Ltr., *supra* n. 167, (discussing state regulators lack knowledge about newer exemptions and inability to interpret federal statutes, and in the case of Reg A+ issuers often pay fees by to states where no transaction occurs.); Goodwin Proctor Ltr., *supra* n. 264 at 8 (“Tier 2 issuers, some issuers pay upwards of \$25,000 per year in notice and filing fees to the 50 states – and, because this fee is paid before sales take place, it is a cost that issuers must incur regardless of whether an offering ultimately has a single investor in a given state in which the fee is paid.”); Crowdcheck Ltr., *supra* n. 251 at 29 (“[T]he states have differing requirements with respect to the timing of notice filings ranging from requiring filing 21 days prior to ‘offers’ (which is not consistent with the ability to test the waters under Rule 255) to requiring filing prior to qualification, to not accepting filings before qualification.”); ABA

invoke state filing costs only after local sales. Reg A+ and Reg CF issuers place all offer documents on EDGAR²⁷⁶ making them publicly available for fraud investigations. At the least, Congress should reconcile Reg A+ issuers that often pay fees to all possible jurisdictions with Reg CF where at most issuers pay two.²⁷⁷

Exempt Regulation A+ and Regulation Crowdfunding from the 12(g) Rule. The Commission in its familiar style conditionally exempts these issuers from the 12(g) Rule. Congress could simplify worries for those choosing these innovative exemptions by removing this hinderance completely. The 12(g) Rule constantly foments angst for growing companies.²⁷⁸ Even if applied to Reg D, where investors are likely accredited, it should not worry issuers crowdfunding investment from ordinary Americans.²⁷⁹

Raise the Regulation A+ Offer Limit to \$100 million. Congress should raise the Reg A+ 12-month aggregate offer limit to \$100 million. After previous considerations, the Commission now proposes a jump to \$75 million.²⁸⁰ Given the usual pace it may be several more years before it is raised again, despite Congressional directive.²⁸¹ Congress should skip this potentially years-long wait while keeping Title IV's biennial review.

Ltr., *supra* n. 253 at 12 (“State advance notice and filing fee requirements for Tier 2 offerings impose a substantial burden on the issuers without any corresponding benefit.”).

²⁷⁶ EDGAR, the SEC public database, is an acronym for Electronic Data Gathering, Analysis, and Retrieval, <https://www.sec.gov/edgar/about>.

²⁷⁸ Crowdcheck Ltr., *supra* n. 251 at 24 (“Issuers and their counsel currently contort themselves into legal pretzels trying to structure deals in such a way that 12(g) is not triggered.”) *Cf.* Concept Release, *supra* n. 2 at 141 (discussing reluctance by issuers using Reg CF to take more than 500 unaccredited investors because of Rule 12(g) concerns.).

²⁷⁹ Campbell Ltr., *supra* n. 50 at 14-15 (discussing how Rule 12(g) and reporting requirements impose “what amounts to penalties on small issuers using particular exemptions from registration, such as Regulation A+ (or Crowdfunding.)”).

²⁸⁰ *See* Proposed Rules, *supra* n. 1 at 117-120 for Commission rationale.

²⁸¹ Pub. L. No. 112-106, sec. 401(b)(5), 126 Stat. 325 [15 U.S.C. § 77c(b)(2)(5) (2018)].

Raise the Regulation Crowdfunding Offer Limit to \$20 million. Congress should raise Reg CF’s 12-month aggregate offer limit to \$20 million and add a statutory requirement like Reg A+ that the Commission biennially review it. The Commission’s proposed raise to \$5 million is welcome but will likely follow the usual pace. Without significant encouragement to monied institutional investors, Reg CF adoption will remain languid.

Simplify or eliminate individual limits for Regulation A+ and Regulation Crowdfunding.

Congress should remove individual formulas for unaccredited investors in Reg A+ and Reg CF and replace them with hard dollar amounts per investment, not aggregate per 12 months. The Commission proposal to eliminate Reg CF accredited investor limits is encouraging. But both Reg A+ and Reg CF hamper unaccredited investors with annual income, net worth formulas. This confuses investors and invokes security and privacy concerns.²⁸² A hard inflation-adjusted number would be simpler and straightforward. For instance, \$10,000 per Reg CF investment and \$20,000 per Reg A+.²⁸³ Alternatively, Congress should eliminate the limits completely.

Limit financial and reporting requirements for Regulation A+ and Regulation CF. Without a robust secondary market, post-raise reports for Reg A+ and Reg CF make no sense.²⁸⁴ These reports are expensive and time consuming. Moreover, audits make no sense for companies with little operating history.²⁸⁵ Congress should limit Reg A+ post-raise reports to annual and remove

²⁸² Schwartz Ltr., *supra* n. 235 at 5 (discussing privacy and security concerns investors have with the current model and the benefits of Australia’s hard-number model.).

²⁸³ Silicon Prairie Ltr., *supra* n. 245 at 8 (Contrasting the simple \$10,000/investor/year individual investment limit for the Minnesota intrastate crowdfunding to the “largely ineffective (and wholly unenforceable)” federal model.).

²⁸⁴ Coinlist Ltr., *supra* n. 253 at 5 (“It is not clear what the necessity of providing ongoing disclosure is if the securities cannot be transferred.”) *Cf.* Rodrigues, *Dirty Secret*, *supra* n. 27 at 3427 (“The secondary market is where the payoff for issuer disclosure really emerges.”).

²⁸⁵ Republic Ltr., *supra* n. 33 at 6 (“We know from three years of experience that the accounting requirements are the single most burdensome disclosure requirement (arguably, the only burdensome disclosure requirement) of Regulation Crowdfunding.”); Burton Ltr., *supra* n. 23 at 46 (“Requiring audited financial statements for a crowdfunding company is ludicrous. It is one of the most obvious examples of how the disclosure requirements do not fit together across exemptions. Issuers offering ten times this much (or more) need not obtain audited financials

Reg CF post-raise reporting altogether. It should also end Reg CF audit requirements and allow CPA financial-statement reviews for all raises over \$107,000, including subsequent raises.

Combine Regulation D 506(b) and Regulation D 506(c) and allow accredited investor verification via affidavit. The Commission’s Reg D 506(c) “reasonable steps” verification methods are cumbersome and invasive. Congress should allow investors to represent under penalty of perjury they understand the accredited investor definition and meet the thresholds. If investors willfully lie, fault should lie with them.

Upon these changes, issuers may split between consumer-focused companies that thrive with heavy adoption choosing Reg A+/Reg CF and issuers with business to business focus choosing Reg D. Or issuers may tailor combinations. But under simplified rules accepting numerous unaccredited investors as brand ambassadors would be more appealing for issuers and potentially profitable for those investors. This is especially true of tokenized offerings.

D. Where the SEC Should Act

The Commission should recognize its failures. When state regulators meddle policy failures occur. The Commission should not encourage state-review mechanisms.²⁸⁶ It sometimes dryly notes how Blue Sky laws affect exemption use²⁸⁷ but never solves it. The Commission should

using other exemptions.”); Schwartz Ltr., *supra* n. 235 at 4 (“[A] significant percentage of crowdfunding issuers have very little income or assets to report, making financial statements practically irrelevant for them.”); Mainvest Ltr., *supra* n. 255 at 6 (“In most cases, adding the CPA review to the upfront costs, provides almost no value to investors and adds an often-prohibitive cost to entrepreneurs.”).

²⁸⁶ Proposed Rules, *supra* n. 1 at 125 (“We believe that raising the threshold would permit issuers to seek more capital at a lower marginal cost than under the current [Reg D 504] rule and may encourage regional multistate offerings and the use of state coordinated review programs, resulting in more issuers conducting offerings under the exemption . . .”).

²⁸⁷ *See e.g.*, Regulation A Report, *supra* n. 135 at 9 (“The larger Tier 2 offering limit does not appear to be the sole factor for issuers’ decision between tiers . . . Blue sky law preemption, facilitating nationwide solicitation and solicitation over the Internet, may have contributed to the popularity of Tier 2 offerings among issuers seeking the lower amount.”); *Id.* at 15 (“Some commenters have noted that state registration requirements for secondary market transactions in Regulation A securities limit liquidity in the Regulation A market.”); Concept Release, *supra* n. 2 at 87, n.279, (discussing the vast differential in number of states issuers offer in Tier 2 compared to Tier 1, “We

admit private markets will never return to 1970s bad old days or pre-NSMIA. States should prosecute fraud after citizen complaints, in other words, reactive.²⁸⁸ No evidence shows career civil-service personnel have the acumen or mindset to evaluate new companies or ideas.

Eliminate Regulation A+ Tier 1. No issuer should be subject to double review. Federal processes suffice. Efforts by state regulators to streamline reviews have failed and should be acknowledged as such.²⁸⁹ After five years, the plague-like attitude toward Tier 1 should provide ample evidence the Commission should scrap it. Raising Reg CF to \$20 million and Reg A+ to \$100 million provides a better solution.²⁹⁰

Eliminate Regulation D 504. The same issues that animate Reg A+ Tier 1 resound to Reg D 504. The Proposed Rules suggest raising the Reg D 504 limit to \$10 million from \$5 million.²⁹¹ The Commission should not keep trying to “fix” decades-old failures with higher caps without addressing underlying reasons for nonuse. Eliminating the Reg D 504 cap completely will not boost it given looming Blue Sky burdens. As it stands Reg D 504 (and the now-repealed Reg D 505) account for 2% of all Regulation D raises under \$5 million.²⁹² One must wonder what raising the Reg D 504 limit to \$10 million would achieve.²⁹³ Would raising the 2% level to 5%

recognize that this differential observed in the data may be related to the fact that, under the 2015 Regulation A amendments, state registration requirements apply to Tier 1 but not to Tier 2 offerings.”).

²⁸⁸ Rutheford B. Campbell, Jr., *Federalism Gone Amuck- The Case for Reallocating Governmental Authority over the Capital Formation Activities of Businesses*, 50 WASHBURN L.J. 573, 573-574 (2011) (arguing that states should reallocate “scarce state resources to their most efficient use, which is the support of the states' enforcement of their antifraud provisions.”).

²⁸⁹ Burton Ltr., *supra* n. 23 at 38 (“The NASAA coordinated review program is a failure and should be acknowledged as such.”); *Cf.* Campbell, *Under the Bus*, *supra* n. 83 at 339, (describing previous failed NASSA attempts at uniformity.).

²⁹⁰ Crowdfund Captial Ltr., *supra* n. 259 at 4, (suggesting eliminating Reg A+ Tier 1 because Blue Sky laws make it impractical and replacing it with Reg CF at \$20 million offering limit.).

²⁹¹ Proposed Rules, *supra* n. 1 at 125.

²⁹² *Id.* at 122-123.

²⁹³ In 2016 the Commission raised the aggregate amount an issuer may offer and sell in any 12-month period for Reg D 504 from \$1 million to \$5 million but notes, “[The] data suggests that the higher threshold limits have not encouraged more issuers to conduct new offerings under the Rule 504 exemption, although those using the exemption are able to raise more capital in each offering and in the aggregate.” Proposed Rules, *supra* n. 1 at 124.

(an unlikely outcome) be good public policy? If so straightforward rules with three exemptions would be better.

CONCLUSION

Despite Commission belief, private-capital raising needs a paradigm shift. The Commission should recognize its presuppositions do not match the current age much less the one coming. Paternalistic investor protections that deter capital formation and efficient markets hamper America's global competitiveness. Its tendency to include state brethren leads to policy failures that can last decades.²⁹⁴ The Commission recognizes these failures begrudgingly if at all. Its inability to adjust to innovation and New Deal era "fact and circumstances" analysis already harm domestic entrepreneurs.

As David Burton aptly states, "The core problem with the current U.S. securities regulation system is its negative impact on small, start-up and emerging growth companies and, therefore, the adverse impact it has on entrepreneurship and the growth potential of the economy."²⁹⁵ This is not a new insight. Four decades ago, Congress and the Commission recognized the capital-raising burdens it placed on small businesses and entrepreneurs.²⁹⁶ In 2012, Congress tried to help via the JOBS Act. Unfortunately, even before enactment, the Commission treated the law as adversarial with predictable results. The future U.S. economy is too important to leave to well-

²⁹⁴ Campbell, *Under the Bus*, *supra* n. 83 at 347 (Describing Commission actions and inactions over the last 20 years that have enabled NASAA obstruction of small business capital formation.). *Id.* at 350 ("Simply stated, my conclusion is that the Commission will continue to enable NASAA and state regulators to preserve a regime to makes it unnecessarily difficult, inefficient, and unfair for small businesses to access external capital. My other simple, related conclusion is that only Congress can break this gridlock by enacting statutory preemptions of state authority over registration.").

²⁹⁵ Burton Ltr., *supra* n. 23 at 22.

intentioned Commission staff. Congress should improve the JOBS Act with a second try that fulfills the first's promise while curtailing discretionary powers that caused it to falter.
